2 OVERVIEW

Khaleeji Commercial Bank is known to be one of the leading Islamic banks in the Kingdom of Bahrain. Established in 2004, the bank has gained a well-acclaimed reputation in the field of Islamic banking. With the loyal and trust of its shareholders, investors and clients, Khaleeji Commercial Bank has achieved key milestones over the years.

The Bank strives to be a leader in local and regional Islamic banking as it is listed on Bahrain Bourse and Dubai Financial Market. It also offers innovative and high quality products and services to its clients. The Board of Directors of the Bank is composed of recognized veterans and prominent personalities in the field of banking.

The Managerial Team consists of a group of banking experts and professionals. There also exists a Shari'a Supervisory Board comprised of specialized jurists prominent both within the region as well as around the world. The Supervisory Board on a regular basis oversees the bank's compliance, workflow and activity guidance, ensuring adherence to the principles and provisions of Islamic Shari'a.

VISION

To become one of the stronghold of the domestic economy and regional Islamic Banking by providing unique, innovative and trustworthy Shari'a compliant products, services and investment opportunities for our clients.

MISSION

Emerge as a catalyst in the economic development of Bahrain, the GCC and the MENA region, maximize client and shareholder value in accordance with the principles of Shari'a, contribute towards stable growth of Islamic Banking and provide a challenging, composed and optimistic environment for our employees to be innovative and attain their professional milestones.

VALUES

TRUSTWORTHY

KHCB will empower its clients by providing the best services available and responding to their different needs, creating long term relationships with them.

STABLE

KHCB will continue on the path of growth and expansion, whilst exploring & capitalizing on opportunities in key local and regional markets.

OPTIMISTIC

KHCB will always have positive assurance and optimism in the face of financial uncertainty.

STRONG

KHCB's ability to adapt and transform to market conditions is one of the strengths that will lead its customers and shareholders towards a profitable future.

COMPOSED

KHCB will continue practicing financial affairs with poise and fortitude while investing its long expertise in Islamic financing.

Financial Market

CHAIRMAN'S REPORT

DESPITE THE PREVAILING MARKET SITUATION THAT CONTINUED DURING THE YEAR, THE BANK WAS ABLE TO OVERCOME VARIOUS CHALLENGES ATTRIBUTED TO THE IMPLEMENTATION OF OUR APPROACH AND STRATEGIC DIRECTION.

Dear Shareholders,

In the name of Allah, the beneficent, the merciful, prayers and peace upon the last apostle and messenger, our prophet Muhammad.

On behalf of the Board of Directors, it is my pleasure to present the annual report of Khaleeji Commercial Bank (the “**Bank**”) for the year ended 31 December 2018.

Throughout this year, the Bank has continued to generate annual profits attributable to the shareholders of the parent company that is despite the

challenges the financial sector and market are currently facing due to the continuation of low oil prices. The Bank continued to be profitable during the year, with 2018 positioning the Bank on an upward trend in terms of enhancing its liquidity and asset quality.

Despite the prevailing market situation that continued during the year, the Bank was able to overcome various challenges attributed to the implementation of our approach and strategic direction. Whereby the Bank, as an upcoming Islamic financial institution, was able to provide various innovative financial

solutions that added value to all stakeholders. The Bank will continue to pursue its expansion strategy through adopting several initiatives and progressive strategies that are directed towards enhancement of the Bank's positioning, market share/reach and competitive advantage.

OVERALL PERFORMANCE

The Bank, during 2018, was able to achieve the strategic goals set by the board. This was achieved by implementation of a work structure that studies the market, invest in available opportunities and offer products and services that are aligned with the clients' expectation. Such enhancement in its products and services was the result of investing in the Bank's positioning locally and regionally.

A positive indicator of the Bank's performance this year is the growth of total assets from BD 785.2 million in 2017 to BD 850.9 million in 2018, a growth of 8.4%. Customer Deposits grew to BD 537.3 million in 2018 compared to BD 496.0 million in 2017, a growth of 8.3%. Corporate financing reached BD 301.2 million in 2018 compared to BD 298.7 million in 2017, a growth of 0.8%.

Furthermore, the Bank was able to achieve growth in liquid assets which currently comprises 30% of Total Assets while the Capital Adequacy Ratio reached 16.23%. This has in turn allowed the Bank to invest the liquidity in prominent Sukuk investments that are characterised with high yield and low risk. Such investments resulted in a considerable increase in the Sukuk portfolio reaching BD 161.3 million in 2018 compared to BD 113.3 million in

2017, a growth of 42.3%. As a result, the Bank, thanks to Allah, in 2018 achieved a net profit attributable to shareholders of the parent BD 0.659 million. As the Bank continued to execute its strategic plan, the Board and the Management conducted a review to ensure that assets, especially those acquired prior to the new business model reflect realisable and fair value. Based on this review, the Board decided to take an amount of BD 6.3 million as provisions for the year ended 31 December 2018, such conservative approach has been taken in order to enhance the Bank's financial positioning and to further support its growth in 2019.

Such results were a factor of the continued expansion of financial activities and efforts of the management that have applied with the organisations' strategic goals. The Bank, throughout this year, worked on improving the Bank's balance sheet by way of booking a strong high quality asset base in addition to improving the services provided to the Bank's clients. In addition, the Bank adopted a strategy of enhancing the revenues targeting both short and long term tenors. This has resulted in the management's focus towards targeting the liquidity and balance sheet towards local and regional projects that are characterised with having strong and adequate collaterals.

LOOKING AHEAD

The Board believes that the Bank is moving steadily towards enhancing its advanced positioning among other Islamic Banks in the Kingdom of Bahrain. The same is evident from the

**INCREASE IN TOTAL
ASSETS SINCE 2017**

increase in the number of clients of the Bank in 2018. This has in turn driven the Bank toward adopting important and expansionary initiatives that the Bank aims to achieve in 2019 and the years to follow which include the Bank's plans to continue improving the financing portfolio at both the Corporate and Retail level.

Further, the Bank aims to invest the positioning it has achieved both locally and regionally to help achieve the strategic goals set. In order to achieve this, the Bank will work on growing and diversifying its products and services that are offered through the branches and electronic channels in order to reach and widen the customer base along with focus on the service/product quality that will reflect on improving the Bank's competitive advantage. This will further lead to focus on investment in Information Technology and enhancing risk management.

APPRECIATION

On behalf of the Board, I would like to express my gratitude to his Majesty King Hamad Bin Isa Al Khalifa; His Royal Highness Prince Khalifa Bin Salman Al Khalifa, the Prime Minister; and His Royal Highness Prince Salman Bin Hamad Al Khalifa, the Crown Prince and Deputy Supreme Commander of Bahrain Defence Force and First Deputy Prime Minister for their encouragement of the growth of the private sector and the development of the banking and finance industry in Bahrain. I also extend my thanks to all government ministries, the Central Bank of Bahrain and Bahrain Bourse for their continued guidance and support.

Special appreciation is due to the Bank's shareholders, clients and business partners for their on-going confidence and loyalty; and to the Bank's management and staff for their hard work and dedication.

Allah the almighty is the purveyor of all success.

5 EXECUTIVE MANAGEMENT REPORT

KHCB FINDS ITSELF IN THE CORE OF THE NATIONAL TRENDS THAT AIM TO UNIFY EFFORTS, PRIORITIES AND STRATEGIC OPTIONS TOWARDS STRENGTHENING THE NATIONAL ECONOMY AND BUILDING A BRIGHTER FUTURE.

Dear Shareholders,

In the name of Allah, the beneficent, the merciful, prayers and peace upon the last apostle and messenger, our prophet Muhammad.

The year 2018 was exceptional with regards to the fluctuations witnessed by the global and local economy, leaving an impact on the banking and financial sector in the Kingdom of Bahrain. It required us to develop a business model based on market research, interaction with changes and to launch investment initiatives that contributed to risk mitigation and sustainable growth.

However, in the Kingdom of Bahrain, we are confident that we have surpassed this stage thanks to economic flexibility and the business-friendly environment of the Kingdom. This has reflected on the continuity of achieving positive growth rates as well as the confidence placed in the Bahraini economy and its competitive potential, simultaneously with the support received from the brotherly GCC states.

This also comes in light of the respected Government's adoption of a comprehensive program that aims to achieve financial balance by restructuring the State Budget to

benefit from the economic growth in addition to implementing initiatives to reduce government spending, increase revenues and strengthening the provision of services to citizens, contributing to the promotion of investment, the development of key sectors and the diversification of the local economy.

KHCB finds itself in the core of the national trends that aim to unify efforts, priorities and strategic options towards strengthening the national economy and building a brighter future. In this context and throughout the past year, the Bank has continued to exert more efforts to develop its business and reach unprecedented levels that satisfy our ambitions and meet the aspirations of our valuable clients. In the past year, we focused on strategic axes, the most important of which are the establishment and development of banking relations in the corporate finance sector, and that is through the design of financial products and high quality banking services to meet the needs of these companies and help them grow, compete and prosper in a competitive environment.

We have also worked on consolidating relations with our strategic partners through partaking in new agreements that contribute to business development and achieve strategic objectives, the most important of which are to increase the capacity of assets and improve their quality, as the bank continued its efforts to strengthen its financial position by channeling funds towards existing local and regional projects, which are characterized by the robustness of their assets.

On the other hand, the bank continues to focus on its core business model as an Islamic retail bank by working on the fundamentals of banking that are based on depositary and financing, as well as creating a range of innovative products and services designed to meet customer expectations and the needs of the local market.

During the year 2018, the bank was prepared to keep pace with the digital transformation of the banking industry by creating a solid base in terms of cadres and digital systems, which is within the framework of the Kingdom's pioneering approach in the field of digital banking.

With regards to Bahrainisation, KHCB is at the forefront of the institutions that are proud of its Bahraini workforce percentage, which is at 97%. This comes in harmony with the bank's strategic plan for qualifying national cadres to fill the top positions in the bank. In this regard, we are always keen to develop policies and procedures within the bank to encourage the work team to succeed, boost productivity and long-term growth.

In the same context, we must point to the key contributions of Bahraini women in the successes that we have attained, as the bank is keen on providing the perfect environment to empower women and support them in developing their professional careers, applying the principle of equal opportunities and removing any obstacles or challenges facing them, as women are now occupying various administrative levels in the bank.

At KHCB, we recognize the magnitude of the responsibility given to us by our valued shareholders, especially as

WE HAVE ALSO WORKED ON CONSOLIDATING RELATIONS WITH OUR STRATEGIC PARTNERS THROUGH PARTAKING IN NEW AGREEMENTS THAT CONTRIBUTE TO BUSINESS DEVELOPMENT AND ACHIEVE STRATEGIC OBJECTIVES

we are facing a changing economic scene that attaches great importance to investment of our position on a local and regional level, and to benefit from the strong base we stand on today. As we celebrate the achievements of a year gone by, we enthusiastically and determinedly look forward to dedicate more efforts to continue accomplishing remarkable achievements and overcoming challenges.

In conclusion, I would like to take this opportunity to express my sincere thanks and appreciation to the respected Government of the Kingdom of Bahrain for its efforts to encourage the banking sector, to KHCB's Chairman and members of the Board of Directors for their wise guidance, to the Executive Management and staff for their commitment and efforts, and finally to our shareholders and clients for their continuous trust and support.

- Member of the centralized Shari'a Supervisory Board of Central Bank of Bahrain.
- Member of Shari'a Supervisory Board of a number of Islamic banks & insurance companies.

Qualification

- Ph.D. in Islamic Studies.

CORPORATE GOVERNANCE

CORPORATE GOVERNANCE STRUCTURE

The Bank's corporate governance framework focuses on Board responsibility, oversight and management accountability vis-à-vis governing regulations and better practices. The framework is in line with global best practices and regulatory requirements which seek to balance entrepreneurship, control and transparency, while creating value for all stakeholders.

Corporate governance, the way the Board and Management is organized and how they operate in practice ultimately aims at leading the Bank towards successfully meeting its strategic objectives. The Board of Directors is accountable to the Bank's shareholders for the creation and delivery of strong sustainable financial performance and long-term shareholder value. To achieve this, the Board approves and monitors the Bank's strategy and financial performance, within a framework of sound corporate governance and effective risk management.

The Bank is in compliance with the Corporate Governance Code (CGC), the Public Disclosure Module and the Stock Exchange Disclosure Standards set by the CBB. The corporate governance philosophy of the Bank is to be fully ethical and transparent in all dealings. In pursuit of this goal, the Board of Directors have approved a Corporate Governance Framework, Director's Conflict of Interest Policy and the Bank Key Persons' Dealing Policy. The Bank, through its Board and Committees, endeavors to deliver the highest governing standards for the benefit of its stakeholders.

The Bank is committed to continuously reviewing and developing its corporate governance standards to ensure compliance with the requirements of the revised corporate governance framework being implemented by the Central Bank of Bahrain and

other regulatory bodies, and also to keep abreast with international best practice.

BOARD OF DIRECTORS

The Board of Directors comprises of 10 members. The chairman of the Board of Directors is charged with regular supervision and assessment of executive management and is responsible for leading the Board, ensuring its effectiveness, monitoring the performance of the CEO and maintaining a dialogue with the Bank's stakeholders. The Board has constituted certain committees with specific delegated authorities to oversee and guide the management in specific areas of the Bank's operations and decision-making. The Board, either directly or through its various committees, will oversee the management of the Bank.

BOARD COMMITTEES STRUCTURE

The Board of Directors has constituted three committees with specific delegated authorities.

- **The Board Audit and Risk Management Committee (BARMC)**, which is responsible for internal and external audit, compliance and anti-money laundering. Beside its responsibility in ensuring that the Bank's overall risk management framework is effective and that key risks are managed within parameters established by the Board (During the year, the Board Audit Committee (BAC) and the Board Risk Management Committee (BRMC) were merged into one committee, the Board Audit and Risk Management Committee (BARMC)).

- **The Board Investment & Credit Committee (BICC)**, which is responsible for investment and credit approvals, setting limits and tolerances for different risks, asset liability management, monitoring asset impairment and creation

of loss provisions, maintaining banking relationships, as well as for the oversight of the off-balance sheet vehicles.

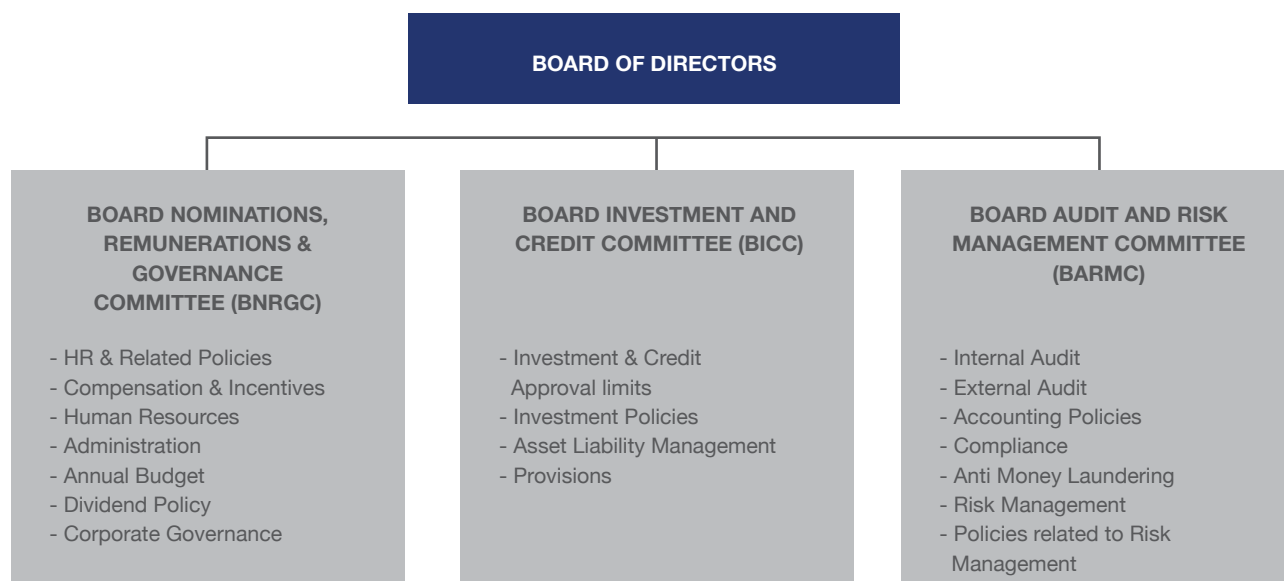

- **The Board Nominations, Remunerations and Governance Committee (BNRGC)**, which is responsible for setting policies for compensation and incentives, human resources and administration. It is also responsible for the corporate governance framework of the Bank.

The Chairman, the Board of Directors and the Board Committees have direct access to the heads of Internal Audit, Risk Management, Regulatory Compliance, Internal Shari'a Audit and Shari'a Coordination and Implementation.

Meetings of the Board and its committees are held as and when required but in accordance with the Regulations the Board meets at least once a quarter. The Board of Directors met 6 times in 2018. The Bank held its AGM and EGM on 13 March 2018. In addition to physical meetings, several written resolutions were circulated to the Directors during 2015 for approval by mail and facsimile.

During the year, the Board Audit and Risk Management Committee (BARMC) held 5 meetings, the Board Investment and Credit Committee (BICC) held 13 meetings, and the Board Nominations, Remunerations and Governance Committee (BNRGC) held 3 meetings.

EXECUTIVE MANAGEMENT COMMITTEES

The Board of Directors delegates the authority for day-to-day management of the business to the Chief Executive Officer (CEO) who is responsible for implementing the Bank's strategic plan. The CEO manages the Bank through the following management committees:

10 RISK MANAGEMENT

The Bank will always thrive to achieve a sustainable, and continuously enhanced stakeholders' value at an acceptable / calculated level of risk, within Islamic Sharia framework, while at the same time adhering to social responsibilities of being good citizens and being fair and transparent to its stakeholders.

All business decisions in the Bank are considered after thorough risk and reward analysis adequate for the size and nature of business being considered.

By the nature of its business, the Bank is exposed to risks, which include, but are not limited to, credit, market, and liquidity, and operational risk. The Bank's aim is to achieve an appropriate balance between risk and return and minimize any potential adverse impact on its overall performance.

The Bank adopts a robust risk management framework to manage its risks. This framework is based on assessment of the risk capacity, definition of appropriate risk appetite, development of policies and procedures for managing risks, measurement of adequate return for the risk assumed, and establishment of strong business and risk cultures.

The Board of Directors has the primary responsibility for managing risks in the Bank. It discharges its responsibilities through the Board Audit & Risk Management Committee ("BARMC") and is responsible for effective implementation of the Bank's risk management framework described above.

The daily management of risk is overseen by the Risk Management Division which is headed by a Chief Risk Officer who reports

directly to the BARMC. The Risk Management Division is responsible for the identification, assessment and ongoing control of all material risks that could affect the Bank's business and operations. In doing so, the Risk Management Division, in coordination with the Management and the BARMC, implements a risk management process that is based on the following principles:

- Alignment of Business Strategy and Risk Appetite.
- Risk identification and measurement
- Risk prioritization
- Risk monitoring
- Risk Mitigation

SHARI'A SUPERVISORY BOARD REPORT

PRAYERS AND PEACE UPON THE LAST APOSTLE AND MESSENGER, OUR PROPHET MOHAMMED, HIS FAMILY AND COMPANIONS.

In compliance with our terms of appointment, the Shari'a Supervisory Board "SSB" hereby present the following report to the Shareholder on the activities of Khaleeji Commercial Bank "KHCB" and its subsidiaries for the financial year ending on 31/12/2018:

The SSB has reviewed the Bank's activities and subsidiaries which includes the Bank investments, financing, contracts, agreements, structures and products. In addition to the consolidated financial statement as of 31/12/2018, in order to ensure that KHCB adheres to fatwas and decisions issued by SSB and the Shari'a standards issued by Accounting and Auditing Organization for Islamic Financial Institutions "AAOIFI".

The SSB appreciates the effort done by the managements in order to comply with the Shari'a Governance issued by the Central Bank of Bahrain.

RESPECTIVE RESPONSIBILITIES OF BOARD OF DIRECTORS AND "SSB"

The SSB believes that as a general principle and practice, KHCB's management is responsible for ensuring that it conducts its business in accordance with Islamic Shari'a rules and principles. The SSB's responsibility to form an independent Shari'a opinion based on our review of the Bank's operations and to prepare this report.

BASIS OF OPINION

Based on SSB's Fatwas and decisions, AAOIFI standards and Shari'a Audit Plan, the SSB conducted Shari'a audit and review through its periodic meetings and its executive member, in coordination with the Shari'a Compliance Department through the examination of documents and transactions by conducting samples test method. Moreover, the distribution of profits and loss 'if any' on investment accounts is compatible with established AAOIFI standards. The SSB is further satisfied that any income that is prohibited by the provisions and principles of Islamic Shari'a has been transferred to a charity account. In addition, Zakah pool was calculated on the basis of net asset method. The shareholders are responsible for payment of their portion of Zakah on their shares.

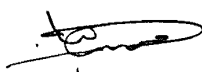

OPINION

The SSB is satisfied that the Bank's activities, services, Financing and Investments are in compliance with the Islamic Shari'a rules and principles.

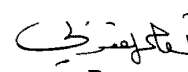

We pray Allah the almighty to grant us all success and prosperity.

INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS

REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS

We have audited the accompanying consolidated financial statements of Khaleeji Commercial Bank B.S.C. ("the Bank") and its subsidiaries (together the "Group"), which comprise the consolidated statement of financial position as at 31 December 2018, the consolidated statements of income, the changes in equity, cash flows, changes in restricted investment accounts and sources and uses of zakah and charity fund for the year then ended, and a summary of significant accounting policies and other explanatory notes.

RESPECTIVE RESPONSIBILITIES OF BOARD OF DIRECTORS AND AUDITORS

These consolidated financial statements and the Group's undertaking to operate in accordance with Islamic Shari'a rules and principles are the responsibility of the board of directors of the Bank. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

BASIS OF OPINION

We conducted our audit in accordance with Auditing Standards for Islamic Financial Institutions issued by Accounting and Auditing Organisation for Islamic Financial Institutions. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

OPINION

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 December 2018 and of its consolidated results of operations, its consolidated cash flows, its consolidated changes in equity, its consolidated changes in restricted investment accounts and its consolidated sources and uses of zakah and charity fund for the year then ended in accordance with Financial Accounting Standards issued by the Accounting and Auditing Organisation for Islamic Financial Institutions and the Shari'a rules and principles as determined by the Shari'a Supervisory Board of the Bank.

REPORT ON OTHER REGULATORY REQUIREMENTS

As required by the Commercial Companies Law and Volume 2 of the Rule Book issued by the Central Bank of Bahrain (CBB), we report that:

- a) the Bank has maintained proper accounting records and the consolidated financial statements are in agreement therewith;
- b) the financial information contained in the chairman's report is consistent with the consolidated financial statements;
- c) we are not aware of any violations during the year of the Commercial Companies Law, the Central Bank of Bahrain and Financial Institutions Law, the CBB Rule Book (Volume 2 and applicable provisions of Volume 6 and CBB directives), the CBB Capital Markets Regulations and associated resolutions, the Bahrain Bourse rules and procedures or the terms of the Bank's memorandum and articles of association that would have had a material adverse effect on the business of the Bank or on its financial position; and
- d) satisfactory explanations and information have been provided to us by management in response to all our requests.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

1. REPORTING ENTITY

Khaleeji Commercial Bank BSC ("the Bank"), a public shareholding company, was incorporated on 24 November 2004 in the Kingdom of Bahrain under Commercial Registration No. 55133. The Bank operates under an Islamic retail banking license granted by the Central Bank of Bahrain ("CBB") on 20 October 2003. The Bank's shares are listed on the Bahrain Bourse and Dubai Financial Markets.

The Bank's activities are regulated by the Central Bank of Bahrain (CBB) and supervised by a Religious Supervisory Board to ensure adherence to Shari'a rules and principles in its transactions and activities.

The principal activities of the Bank include providing banking and investment products and services to retail customers, high net worth individuals, corporate entities, and financial institutions. These include retail and corporate banking, consumer finance, wealth management, structured investment products and project financing facilities which comply with Islamic Shari'a rules and principles as determined by the Bank's Shari'a Supervisory Board.

The consolidated financial statements include the financial statements of the Bank and its subsidiaries (together "the Group"). The significant subsidiaries are as follows:

<i>Name</i>	<i>Country of incorporation</i>	<i>% holding 2018</i>	<i>% holding 2017</i>	<i>Nature of business</i>
Hawafiz Khaleeji Management Company BSC (c)	Bahrain	100%	100%	To hold shares for the beneficial interest of the employee incentive scheme. (refer note 20)
Harbour West 2 Real Estate SPC	Bahrain	100%	100%	To hold property for the beneficial interest of the Bank.
Harbour West 4 Real Estate SPC	Bahrain	100%	100%	To hold property for the beneficial interest of the Bank.
Surooh Limited	Cayman Islands	19.08%	19.08%	To construct and sell properties at "Oryx Hills".

2. STATEMENT OF COMPLIANCE

The financial statements have been prepared in accordance with Financial Accounting Standards ('FAS') issued by the Accounting and Auditing Organisation for Islamic Financial Institutions ('AAOIFI'). In line with the requirement of AAOIFI, for matters that are not covered by AAOIFI standards, the Group uses guidance from the relevant International Financial Reporting Standards.

3. BASIS OF PREPARATION

The consolidated financial statements are presented in Bahraini Dinars, which is also the principal currency of the Bank's operations. They have been prepared on the historical cost basis except for the measurement at fair value of certain investments carried at fair value.

The Group classifies its expenses in the income statement by the nature of expense method.

4. USE OF JUDGEMENTS AND ESTIMATES

The preparation of consolidated financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected. Management believes that the underlying assumptions are appropriate and the Group's consolidated financial statements therefore present the financial position and results fairly. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements, are disclosed in note 24.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

5. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of these consolidated financial statements are set out below. These accounting policies have been consistently applied by the Group and are consistent with those used in the previous year, except for the effect of early adoption of FAS 30.

i. Standards issued but not yet effective from 1 January 2018

There were no new standards and / or amendments issued and effective during the year

ii. Standards issued but not yet effective

Early adoption of FAS 30 - impairment, credit losses, and onerous commitments

AAOIFI issued FAS 30 Impairment, Credit losses and onerous commitments in 2017 with effective date of 1 January 2020 with early adoption permitted. The Group early adopted the standard as of 1 January 2018 as mandated by the CBB. The objective of this standard is to establish the principles of assessing impairment and credit losses on various Islamic financing, investment and certain other assets of Islamic financial institutions and provisions against onerous commitments enabling in particular the users of financial statements to fairly assess the amounts, timing and uncertainties with regard to the future cash flows associated with such assets. FAS 30 will replace FAS 11 Provisions and Reserves and parts of FAS 25 Investment in Sukuk, shares and similar instruments that deals with impairment.

FAS 30 classifies assets and exposures into three categories based on the nature of risks involved (i.e. credit risk and other risks) and prescribes three approaches for assessing losses for each of these categories of assets 1) Credit Losses approach, 2) Net Realizable Value approach ("NRV") and 3) Impairment approach.

For the purpose of this standard, the assets and exposures shall be categorized, as under:

- Assets and exposures subject to credit risk (subject to credit losses approach):
 - Receivables; and
 - Off-balance sheet exposures;
- Inventories (subject to net realizable value approach); and
- Other financing and investment assets subject to risks other than credit risk (subject to impairment approach).

Credit losses approach for receivables and off- balance sheet exposures uses a dual measurement approach, under which the loss allowance is measured as either a 12-month expected credit loss or a lifetime expected credit loss.

Expected credit losses

FAS 30 replaces FAS 11 and introduces the credit losses approach with a forward-looking 'expected credit loss' model. The new impairment model will apply to exposures which are subject to credit risk. A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- Determining criteria for significant increase in credit risk (SICR);
- Choosing appropriate models and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated ECL; and
- Establishing segments of similar financial assets for the purposes of measuring ECL.

Impairment loss is the amount by which the carrying amount of asset exceeds its recoverable amount.

The adoption of FAS 30 has resulted in changes in accounting policies for impairment of exposures subject to credit risk and adjustments to the amounts previously recognised in the consolidated financial statements as of the year ended 31 December 2017. As permitted by the transitional provisions of FAS 30, the Group elected not to restate comparative figures. Any adjustments to the carrying amounts of exposures subject to credit risk as at the date of transition were recognised in the opening balance of retained earnings.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

ii. Standards issued but not yet effective (Continued)

Early adoption of FAS 30 - impairment, credit losses, and onerous commitments (Continued)

Disclosure of FAS 30 transition impacts set out below:

(a) Changes in Accounting Policies

The key changes to the Group's accounting policies resulting from the adoption of FAS 30 are summarised in Note 5 (i) (b). Since the comparative financial information has not been restated, the accounting policies in respect of the exposures subject to credit risk for comparative periods are based on respective standards as disclosed in the audited financial statements as of and for the year ended 31 December 2017.

(b) Impact of adopting FAS 30

- (i) The following table reconciles the carrying amounts of exposures subject to credit risk under FAS 11 to the carrying amounts under FAS 30 on 1 January 2018.

	<i>FAS 11 carrying amount at 31 December 2017</i>	<i>Re- Measurement</i>	<i>FAS 30 carrying amount at 1 January 2018</i>
Balances and placements with banks and financial institutions	109,756	2	109,758
Financing assets	354,504	8,833	363,337
Investment in sukuk	113,347	3	113,350
Assets acquired for leasing (including lease rental receivables)	105,783	1,717	107,500
Commitments and financial guarantees	67,137	514	67,651
	750,527	11,069	761,596

- (ii) Impairment of exposures subject to credit risk

Impairment allowance at 31 December 2017 under FAS 11	12,645
Additional impairment recognised at 1 January 2018 on:	
Balances and placements with banks and financial institutions	2
Financing assets	8,833
Assets acquired for leasing (including lease rental receivables)	1,717
Sukuk - Debt-type securities at amortised cost	3
Commitments and financial guarantees	514
Impairment allowance at 1 January 2018 under FAS 30	23,714

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

ii. Standards issued but not yet effective (Continued)

Early adoption of FAS 30 - impairment, credit losses, and onerous commitments (Continued)

iii) The following table shows the carrying amounts of exposures subject to credit risk as of 1 January 2018 by stage:

1 January 2018	Stage 1	Stage 2	Stage 3	Total
Cash and balances with banks	75,787	-	-	75,787
Placements with financial institutions	33,969	-	-	33,969
Financing Assets	232,045	83,337	39,122	354,504
Assets acquired for leasing (including lease rentals receivables)	79,215	16,406	10,162	105,783
Investment in sukuk	113,200	-	147	113,347
Commitments and financial guarantees	46,903	18,950	1,284	67,137
	581,119	118,693	50,715	750,527

iv) Movement of ECL in various stages during the year is as follows:

31 December 2018	Stage 1	Stage 2	Stage 3	Total
Opening balance at 1 January	2,860	10,537	10,317	23,714
Transfer to Stage 1	3,188	(3,086)	(102)	-
Transfer to Stage 2	(316)	398	(82)	-
Transfer to Stage 3	(229)	(2,463)	2,692	-
Net transfers	2,643	(5,151)	2,508	-
Write-off	-	-	(1,566)	(1,566)
Charge for the period (net)	(404)	(1,468)	5,955	4,083
Closing balance as at 31 December	5,099	3,918	17,214	26,231

(a) Basis of consolidation

(i) Subsidiaries

Subsidiaries are those enterprises (including special purpose entities) controlled by the Bank. Control exists when the Bank has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. Subsidiaries are consolidated from the date on which control is transferred to the Group and de-consolidated from the date that control ceases. Control is presumed to exist, when the Group owns more than 50% of voting rights on an entity.

Special purpose entities (SPEs) are entities that are created to accomplish a narrow and well-defined objective such as the securitisation of particular assets, or the execution of a specific borrowing or investment transaction and usually voting rights are relevant for the operating of such entities. An investor that has decision-making power over an investee and exposure to variability of returns determines whether it acts as a principal or as an agent to determine whether there is a linkage between power and returns. When the decision maker is an agent, the link between power and returns is absent and the decision maker's delegated power does not lead to a control conclusion. Where the Group's voluntary actions, such as lending amounts in excess of existing liquidity facilities or extending terms beyond those established originally, change the relationship between the Group and an SPE, the Group performs a reassessment of control over the SPE.

The Group in its fiduciary capacity manages and administers assets held in trust and other investment vehicles on behalf of investors.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(a) Basis of consolidation (Continued)

(i) Subsidiaries (Continued)

The financial statements of SPE are not included in these consolidated financial statements except when the Group controls the entity. Information about the Group's fiduciary assets under management is set out in note 25.

(ii) Associates

Associates are those entities over which the Group holds exercises significant influence, but not control or joint control, over the financial and operating policies.

Investments in associates are initially recognised at cost and the carrying amount is adjusted to recognise the Group's share of the post-acquisition profits or losses of the investee after the date of acquisition. Distributions received from an investee reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the investor's proportionate interest in the investee arising from changes in the investee's equity. When the Group's share of losses exceeds its interest in an associate, the Group's carrying amount is reduced to nil and recognition of further losses is discontinued, except to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

The carrying amount of the equity accounted investment is tested for impairment in accordance with the policy described in note 5 (k) (iii).

(iii) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised gains arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Intra-group gains on transactions between the Group and its equity accounted associates are eliminated to the extent of the Group's interest in the investees. Unrealised losses are also eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment. Accounting policies of the subsidiaries and associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

(b) Foreign currency transactions

Items included in the consolidated financial statements of the Group are measured using the currency of the primary economic environment in which the entity operates ('the functional currency').

Foreign currency transactions are translated using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement. Translation differences on non-monetary items carried at their fair value, such as certain equity securities measured at fair value through equity, are included in investments fair value reserve.

The other Group companies functional currencies are either denominated in Bahraini dinars or US dollars which is effectively pegged to the Bahraini dinar. Hence, the translation of financial statements of the group entities that have a functional currency different from the presentation currency do not result in an exchange difference.

(c) Investment securities

Investment securities comprise investments in equity securities and investments in debt-type securities, sukuk. Investment securities exclude investments in subsidiaries and equity accounted investees (refer note 5(a)).

(i) Classification

The Group segregates its investment securities into debt-type and equity-type instruments. Debt-type instruments are investments that have terms that provide fixed or determinable payments of instruments and include instruments that evidence a residual interest in the assets of an entity after deducting all its liabilities profits and capital. Equity-type instruments are investments that do not exhibit features of debt-type.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(c) Investment securities (Continued)

(i) Classification (Continued)

Debt-type Instruments:

A debt-type investment is classified and measured at amortised cost only if the instrument is managed on a contractual yield basis or the instrument is not held for trading and has not been designated at FVTIS. Debt-type investments at amortised cost include investment in sukuk.

Equity-type investments:

Investments in equity type instruments are classified in the following categories: 1) at fair value through income statement ('FVTIS') or 2) at fair value through equity ('FVTE'), consistent with its investment strategy.

The Group has one investment in equity securities that is designated at FVTIS. The rest are classified as investments at fair value through equity.

(ii) Recognition and de-recognition

Investment securities are recognised at the trade date i.e. the date that the Group contracts to purchase or sell the asset, at which date the Group becomes party to the contractual provisions of the instrument.

Investment securities are derecognised when the rights to receive cash flows from the financial assets have expired or where the Group has transferred substantially all risk and rewards of ownership.

(iii) Measurement

Investment securities are measured initially at fair value, which is the value of the consideration given. For FVTIS investments, transaction costs are expensed in the income statement. For other investment securities, transaction costs are included as a part of the initial recognition.

Subsequent to initial recognition, investments carried at FVTIS and FVTE are re-measured to fair value. Gains and losses arising from a change in the fair value of investments carried at FVTIS are recognised in the income statement in the period in which they arise. Gains and losses arising from a change in the fair value of investments carried at FVTE are recognised in the consolidated statement of changes in equity and presented in a separate fair value reserve within equity. The fair value gains/losses are recognised taking into consideration the split between portions related to owners' equity and equity of investment account holders. When the investments carried at FVTE are sold, impaired, collected or otherwise disposed of, the cumulative gain or loss previously recognised in the statement of changes in equity is transferred to the income statement.

Subsequent to initial recognition, debt-type securities, other than those carried at FVTIS, are measured at amortised cost using the effective profit method less any impairment allowances.

(iv) Measurement principles

Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus capital repayments, plus or minus the cumulative amortisation using the effective profit method of any difference between the initial amount recognised and the maturity amount, minus any reduction (directly or through use of an allowance account) for impairment or uncollectability. The calculation of the effective profit rate includes all fees and points paid or received that are an integral part of the effective profit rate.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(c) Investment securities (Continued)

(iv) Measurement principles (Continued)

Fair value measurement

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction on the measurement date. When available, the Group measure the fair value of an instruments using the quoted price in an active market for that instrument.

For unquoted investments at fair value, the Group uses recognised valuation techniques for fair valuation. Some or all of the inputs into these models may not be market observable, but are estimated based on assumptions. Inputs to valuation techniques reasonably represent market expectations and measures of the risk-return factors inherent in the financial instrument.

Valuation adjustments are recorded to allow for bid-ask spreads, liquidity risks, as well as other factors. Management believes that these valuation adjustments are necessary and appropriate to fairly state the values of these investments.

When there is no quoted price or other appropriate methods from which to derive a reliable fair value, equity investments are carried at cost less impairment.

(d) Financing assets

Financing assets comprise Shari'a compliant financing contracts with fixed or determinable payments. These include financing provided through Murabaha, Musharaka, Mudharaba, Istisna and Wakala contracts. Financing assets are recognised on the date they are originated and are carried at their amortised cost less impairment allowances, if any.

(e) Placements with and from financial institutions, non-financial institutions and individuals

These comprise inter-bank and over the counter customer placements made/received using Shari'a compliant contracts. Placements are usually for short-term and are stated at their amortised cost.

(f) Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents comprise cash and bank balances (excluding CBB reserve account), and placement with financial institutions with original maturities of three months or less when acquired which are subject to insignificant risk of changes in fair value and are used by the Group in the management of its short-term commitments.

(g) Assets acquired for leasing

Assets acquired for leasing (Ijarah Muntahia Bittamleek) are stated at cost less accumulated depreciation and any impairment. Under the terms of lease, the legal title of the asset passes to the lessee at the end of the lease term, provided that all lease instalments are settled. Depreciation is calculated on a straight line basis at rates that systematically reduce the cost of the leased assets over the period of the lease. The Group assesses at each reporting date whether there is objective evidence that the assets acquired for leasing are impaired. Impairment loss is the amount by which the carrying amount of an asset exceeds its recoverable amount. Impairment losses, if any, are recognised in the income statement. The estimates of future cash flows, when dependent on a single customers, takes into consideration the credit evaluation of the respective customer in addition to other factors.

(h) Investment in real estate

Real estate properties held for rental, or for capital appreciation purposes, or both, are classified as investment in real estate. Investments in real estate are carried at cost less depreciation and impairment allowances, if any. Cost includes expenditure that is directly attributable to the acquisition of the investment property. Investment in real estate includes plots of land held for capital appreciation purposes, villas and buildings held for earning rentals. Land is not depreciated. Buildings are depreciated over 25 years.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(i) Development properties

Development property consists of villas being developed for sale in the ordinary course of business and costs incurred in bringing such property to its saleable condition.

Development property is stated at lower of cost or net realisable value. Net realisable value is the estimated selling price in the ordinary course of business less costs to complete development and selling expenses.

(j) Property and equipment

Property and equipment is stated at cost, net of accumulated depreciation and impairment allowances, if any. Property includes land which is not depreciated. Other equipment is depreciated using the straight-line method to write-off the cost of the assets over their estimated useful lives ranging from 3 to 5 years. The assets residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

(k) Impairment of financial instruments

Policy applicable from 1 January 2018

ij) Exposures subject to credit risk

The Group recognises loss allowances for ECLs on:

- Cash and bank balances;
- Placements with financial institutions;
- Financing assets;
- Assets acquired for leasing (including lease rental receivable);
- Investments in Sukuk - debt-type securities at amortised cost; and
- Undrawn financing commitments and financial guarantee contracts issued.

The Group measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- Debt-type securities that are determined to have low credit risk at the reporting date; and
- other debt-type securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

When determining whether the credit risk of an exposure subject to credit risk has increased significantly since initial recognition when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment including forward-looking information.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security, if any is held; or
- the financial asset is more than 90 days past due

The Group considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. The Group considers this to be BBB- or higher per S&P.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(k) Impairment of financial instruments (Continued)

i) Exposures subject to credit risk (Continued)

The Group applies a three-stage approach to measuring ECL on exposures subject to credit risk. Assets migrate through the following three stages based on the change in credit quality since initial recognition.

Stage 1: 12-months ECL

Stage 1 includes exposures subject to credit risk on initial recognition and that do not have a significant increase in risk since initial recognition or that have low credit risk. 12-month ECL is the expected credit losses that from default events that are possible within 12 months after the reporting date. It is not the expected cash shortfalls over the 12-month period but the entire credit loss on an asset weighted by the probability that the loss will occur in the next 12-months.

Stage 2: Lifetime ECL - not credit impaired

Stage 2 includes exposures subject to credit risk that have had a significant increase in credit risk since initial recognition but that do not have objective evidence of impairment. For these assets, lifetime ECL are recognised. Lifetime ECL are the expected credit losses that result from all possible default events over the expected life of the financial instrument. Expected credit losses are the weighted average credit losses with the life-time probability of default ('PD').

Stage 3: Lifetime ECL - credit impaired

Stage 3 includes exposures subject to credit risk that have objective evidence of impairment at the reporting date in accordance with the indicators specified in the CBB's rule book. For these assets, lifetime ECL is recognised.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. They are measured as follows:

- Financing assets and assets acquired for leasing that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive).
- Financing assets and assets acquired for leasing that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;
- Undrawn financing commitment: as the present value of the difference between the contractual cash flows that are due to the Group if the commitment is drawn and the cash flows that the Group expects to receive; and
- Financial guarantee contracts: the expected payments to reimburse the holder less any amounts that the Group expects to recover.

ECLs are discounted at the effective profit rate of the financial instrument.

Credit-impaired exposures

At each reporting date, the Group assesses whether exposures subject to credit risk are credit-impaired. An exposure is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the exposure have occurred. Evidence that an exposure is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 90 days past due;

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(k) Impairment of financial instruments (Continued) Credit-impaired exposures (Continued)

- the restructuring of a financing facility or advance by the Group on terms that the Group would not consider otherwise;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost and assets acquired for leasing are deducted from the gross carrying amount of the assets.

ii) Equity investments classified at fair value through equity (FVTE)

In the case of investments in equity securities classified as FVTE and measured at fair value, a significant or prolonged decline in the fair value of the security below its cost is an objective evidence of impairment. The group considers a decline of 30% to be significant and a period of nine months to be prolonged. If any such evidence exists, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognised in income statement - is removed from equity and recognised in the income statement. Impairment losses recognised in the income statement on equity instruments are subsequently reversed through equity.

For FVTE investments carried at cost less impairment due to the absence of reliable measure of fair value, the Group makes an assessment of whether there is an objective evidence of impairment for each investment by assessment of financial and other operating and economic indicators. Impairment is recognised if the estimated recoverable amount is below the carrying value of the investment.

Policy applicable before 1 January 2018

The Group assesses at each reporting date whether there is objective evidence a financial asset is impaired. Objective evidence that financial assets are impaired can include default or delinquency by a borrower, restructuring of financing facility or advance by the Group on terms that the Group would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, the disappearance of an active market for a security, or other observable data relating to a group of assets such as adverse changes in the payment status of borrowers or issuers in the group, or economic conditions that correlate with defaults in the group. In addition, for an investment in an equity security, a significant or prolonged decline in its fair value below its cost is objective evidence of impairment.

(i) Financial assets carried at amortised cost

These include financing assets, Sukuk (debt-type instruments), and other receivables. For financial assets carried at amortised cost, impairment is measured as the difference between the carrying amount of the financial assets and the present value of estimated cash flows discounted at the assets' original effective profit rate. Losses are recognised in income statement and reflected in an allowance account. When a subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through the income statement. Recovery of written off financial assets is credited to impairment charge for the year. The Group considers evidence of impairment for financial assets carried at amortised cost at both a specific asset and collective level.

All individually significant financial assets are assessed for specific impairment. All individually significant financial assets found not to be specifically impaired are then collectively assessed for any impairment that has been incurred but not yet identified. Financial assets that are not individually significant are collectively assessed for impairment by grouping together assets with similar risk characteristics.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(k) Impairment of financial instruments (Continued) Policy applicable before 1 January 2018 (Continued)

ii) Equity investments classified at fair value through equity (FVTE)

In the case of investments in equity securities classified as FVTE and measured at fair value, a significant or prolonged decline in the fair value of the security below its cost is an objective evidence of impairment. The group considers a decline of 30% to be significant and a period of nine months to be prolonged. If any such evidence exists, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognised in income statement - is removed from equity and recognised in the income statement. Impairment losses recognised in the income statement on equity instruments are subsequently reversed through equity.

For FVTE investments carried at cost less impairment due to the absence of reliable measure of fair value, the Group makes an assessment of whether there is an objective evidence of impairment for each investment by assessment of financial and other operating and economic indicators. Impairment is recognised if the estimated recoverable amount is below the carrying value of the investment.

(l) Impairment of non-financial assets

The carrying amount of the Group's non-financial assets (other than for financial assets covered above), are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. The recoverable amount of an asset is the greater of its value in use or fair value less costs to sell. An impairment loss is recognised whenever the carrying amount of an asset exceeds its estimated recoverable amount. Impairment losses are recognised in the income statement. Impairment losses are reversed only if there is an indication that the impairment loss may no longer exist and there has been a change in the estimates used to determine the recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or cash generating unit. An impairment loss is recognised whenever the carrying amount of an asset or its cash generating unit exceeds its estimated recoverable amount. Impairment losses are recognised in the income statement. Impairment losses are reversed only if there is an indication that the impairment loss may no longer exist and there has been a change in the estimates used to determine the recoverable amount. Separately recognised goodwill is not amortised and is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on separately recognised goodwill are not reversed. As at December 2018, the Group did not have any goodwill recognised.

(m) Customers' current accounts

Balances in current (non-investment) accounts are recognised when received by the Group. The transaction are measured at the cash equivalent amount received by the Group at the time of contracting. At the end of the accounting period, the accounts are measured at their book value.

(n) Equity of investment account holders

Equity of investment account holders are funds held by the Group in unrestricted investment accounts, which it can invest at its own discretion. The investment account holder authorises the Group to invest the account holders' funds in a manner which the Group deems appropriate without laying down any restrictions as to where, how and for what purpose the funds should be invested.

The Group charges management fee (Mudarib fees) to investment account holders. Of the total income from investment accounts, the income attributable to customers is allocated to investment accounts after setting aside provisions, reserves (Profit equalisation reserve and Investment risk reserve) and deducting the Group's share of income as a Mudarib. The allocation of income is determined by the management of the Group within the allowed profit sharing limits as per the terms and conditions of the investment accounts. Only the income earned on pool of assets funded from IAH are allocated between the owners' equity and investment account holders. Administrative expenses incurred in connection with the management of the funds are borne directly by the Group and are not charged separately to investment accounts.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(n) Equity of investment account holders (Continued)

The Group charges specific provision and collective provision to owners' equity. Amounts recovered from these impaired assets is not subject to allocation between the IAH and owners' equity.

Investment accounts are carried at their book values and include amounts retained towards profit equalisation, investment risk reserves, if any. Profit equalisation reserve is the amount appropriated by the Group out of the Mudaraba income, before allocating the Mudarib share, in order to maintain a certain level of return to the deposit holders on the investments. Investment risk reserve is the amount appropriated by the Group out of the income of investment account holders, after allocating the Mudarib share, in order to cater against future losses for investment account holders. Creation of any of these reserves results in an increase in the liability towards the pool of unrestricted investment accounts.

(o) Restricted investment accounts

Restricted investment accounts represents assets acquired by funds provided by holders of restricted investment accounts and their equivalent and managed by the Group as an investment manager based on either a Mudharaba contract or agency contract. The restricted investment accounts are exclusively restricted for investment in specified projects as directed by the investments account holders. Assets that are held in such capacity are not included as assets of the Group in the consolidated financial statements.

(p) Financial guarantees

Financial guarantees are contracts that require the Group to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument. A financial guarantee contract is recognised from the date of its issue. The liability arising from a financial guarantee contract is recognised at the present value of any expected payment, when a payment under the guarantee has become probable.

(q) Treasury shares

The amount of consideration paid including all directly attributable costs incurred in connection with the acquisition of the treasury shares are recognised in equity. Consideration received on sale of treasury shares is presented in the financial statements as a change in equity. No gain or loss is recognised in the income statement on sale of treasury shares.

(r) Statutory reserve

The Bahrain Commercial Companies Law 2001 requires that 10 per cent of the annual net profit be appropriated to a statutory reserve which is normally distributable only on dissolution. Appropriations may cease when the reserve reaches 50 per cent of the paid up share capital.

(s) Revenue recognition

Income from Murabaha and Wakala contracts are recognised on a time-apportioned basis over the period of the contract using the effective profit method.

Profit or losses in respect of the Bank's share in **Musharaka and Mudharaba financing** transaction that commence and end during a single financial period are recognised in the income statement at the time of liquidation (closure of the contract). Where the Musharaka and Mudharaba financing continues for more than one financial period, profit is recognised to the extent that such profits are being distributed during that period in accordance with profit sharing ratio as stipulated in the agreements.

Istisna'a revenue and the associated profit margin is recognised using the percentage of completion method.

Income from assets acquired for leasing (Ijarah Muntahia Bittamleek) are recognised proportionately over the lease term.

Income from sukuk and income/expenses on placements is recognised at its effective profit rate over the term of the instrument.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(s) Revenue recognition (Continued)

Dividend income is recognised when the right to receive is established.

Rental income is recognised on a straight line basis over the term of the contract.

Fees and commission income that are integral to the effective profit rate on a financial asset carried at amortised cost are included in the measurement of the effective profit rate of the financial asset. Other fees and commission income, including account servicing fees, sales commission, management fees, placement and arrangement fees and syndication fees, are recognised as the related services are performed.

(t) Earnings prohibited by Shari'a

The Group is committed to avoid recognising any income generated from non-Islamic sources. Accordingly, all non-Islamic income is credited to a charity account where the Group uses these funds for charitable purposes.

(u) Zakah

Zakah is calculated on the Zakah base of the Group in accordance with FAS 9 Zakah using the net assets method. Zakah is paid by the Group based on the eligible reserve and retained earnings balances at the end of the year and the remaining Zakah is payable by individual shareholders. The Group calculates and notifies the shareholders of their pro-rata share of the Zakah payable annually. The Group also pays Zakah on the balance of treasury shares held at the year-end based on the pro-rata share of Zakah. The calculations of Zakah is approved by the Shari'a Supervisory Board. Payment of Zakah on the unrestricted investment and other accounts is the responsibility of the investment account holders.

(v) Employee benefits

(i) Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A provision is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(ii) Post-employment benefits

Pensions and other social benefits for Bahraini employees are covered by the Social Insurance Organisation scheme, which is a "defined contribution scheme" in nature, and to which employees and employers contribute monthly on a fixed-percentage-of-salaries basis. Contributions by the Group are recognised as an expense in income statement when they are due.

Expatriate employees on fixed contracts are entitled to leaving indemnities payable under the Bahraini Labour Law, based on length of service and final remuneration. Provision for this unfunded commitment has been made by calculating the notional liability had all employees left at the reporting date.

These benefits are in the nature of "defined benefit scheme" and any increase or decrease in the benefit obligation is recognised in the income statement.

The Group also operates a voluntary employees saving scheme under which the Group and the employee contribute monthly on a fixed percentage of salaries basis. The scheme is managed and administered by a board of trustees who are employees of the Group. The scheme is in the nature of a defined contribution scheme and contributions by the Group are recognised as an expense in the income statement when they are due.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

5. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(v) Employee benefits (Continued)

(iii) Share-based employee incentive scheme

The grant-date fair value of equity-settled share-based payment arrangements granted to employees is generally recognised as an expense, with a corresponding increase in equity, over the vesting period of the awards. The amount recognised as an expense is adjusted to reflect the number of awards for which the related service and non-market performance conditions are expected to be met, such that the amount ultimately recognised is based on the number of awards that meet the related service and non-market performance conditions at the vesting date.

For share-based payment awards with non-vesting conditions, the grant-date fair value of the share-based payment is measured to reflect such conditions and there is no true-up for differences between expected and actual outcomes.

(w) Dividends and board remuneration

Dividends to shareholders and board remuneration are recognised as liabilities in the period in which they are declared.

(x) Trade date accounting

All “regular way” purchases and sales of financial assets are recognised on the trade date, i.e. the date that the Group commits to purchase or sell the asset.

(y) Offsetting

Financial assets and liabilities are offset only when there is a legal or Shari’a based enforceable right to set-off the recognised amounts and the Group intends to either settle on a net basis, or to realise the asset and settle the liability simultaneously.

(z) Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

(aa) URIA Protection Scheme

Funds held with the Group in investment accounts and current accounts are covered by the Deposit and URIA Protection Scheme (“the Scheme”) established by the Central Bank of Bahrain regulation in accordance with Resolution No (34) of 2010.

The Scheme applies to all eligible accounts held with the Group subject to certain specific exclusions, maximum total amount entitled and other regulations governing the establishment of a Deposit and URIA Protection Scheme and a Deposit Protection Board.

(bb) Repossessed assets

In certain circumstance, properties are repossessed following the foreclosure on financing facilities that are in default. Repossessed properties are measured at the lower of carrying value and fair value less cost to sell.

(cc) Medium term Borrowing

Medium-term borrowing represents borrowing obtained through murabaha contract recognized on the origination date and carried at amortized cost.

At 1 January	22,802	11,977
Charge for year	11,400	13,415
Settlements during the year	(3,928)	(2,590)
At 31 December	30,274	22,802
Net book value at 31 December	108,678	97,193

At 31 December 2018, accrued lease rental receivable amounted to BD 11,525 thousand (2017: BD 8,590 thousand). Lease rental receivable is net of stage 1 and 2 ECL of BD 245 thousand (2017: BD 1,052 thousand) and Stage 3 ECL of BD 2,211 thousand (2017: 79 thousand). During the year, an impairment allowance of BD 725 thousand (2017: BD 173 thousand) was provided on the lease rental receivables.

Of the total net book value of assets acquired for leasing, consumer financing amounted to BD 85,644 thousand (2017: BD 88,984 thousand).

11. INVESTMENT IN EQUITY SECURITIES

	31 December 2018	31 December 2017
<i>At fair value through income statement</i>		
- Unquoted equity securities (at fair value)	13,148	13,148
<i>At fair value through equity</i>		
- Gross Unquoted equity securities carrying amount (carried at cost less impairment) *	51,972	51,931
Less: Impairment allowances	(15,081)	(12,876)
	50,039	52,203

* Unquoted equity securities at fair value through equity comprise investments in closed companies managed by external investment managers or represent investments in projects promoted by the Group. These investments are carried at cost less impairment in the absence of a market price or a reliable measure of fair value. The Group intends to exit these investments principally by means of private placements, strategic buy outs or sale of underlying assets.

During the year, impairment charge of BD 2,205 thousand (31 December 2017: BD 1,311 thousand) was recognised on equity securities carried at cost.

During the year, the Group has written off fully provided investments of NIL (2017: BD 2,988 thousand).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

14. PLACEMENTS FROM NON-FINANCIAL INSTITUTIONS AND INDIVIDUALS

	31 December 2018	31 December 2017
Non-financial institutions	48,325	14,853
Individuals	72,145	46,506
	120,470	61,359

These represent placements in the form of Murabaha and Wakala contracts. These are net of deferred profit of BD 4,188 thousand (2017: BD 1,856 thousand).

15. MEDIUM-TERM BORROWING

Comprise two medium-term Murabaha facilities of BD 41,357 thousand (2017: BD 41,308 thousand) secured by pledge over sukuk of BD 48,888 thousand (2017: BD 48,888 thousand).

16. OTHER LIABILITIES

	31 December 2018	31 December 2017
Mudaraba profit accrual	4,278	2,860
Employee related accruals	245	189
Zakah and charity payable	708	674
Payable for Istisna'a contracts	27	27
Other payables and accrued expenses	5,254	4,203
	10,512	7,953

17. EQUITY OF INVESTMENT ACCOUNT HOLDERS

The funds received from investment account holders have been commingled and jointly invested with the Group in the following asset classes:

	31 December 2018	31 December 2017
Balances with banks	55,550	24,461
CBB reserve account	20,820	17,460
Placements with financial institutions	43,637	33,969
Debt type instruments - sukuk	161,327	113,199
Financing assets	65,039	170,729
	346,373	359,818

As at 31 December 2018, the balance of profit equalisation reserve and investment risk reserve was Nil (2017: Nil).

Only the profits earned on pool of assets funded from IAH are allocated between the owners' equity and IAH. The Group did not charge any administration expenses to investment accounts.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

17. EQUITY OF INVESTMENT ACCOUNT HOLDERS (CONTINUED)

Following is the average percentage for profit allocation between owner's equity and investment account holders.

	2018		2017	
	Mudarib share	IAH shares	Mudarib share	IAH shares
1 month Mudharaba *	78.66%	21.34%	73.34%	26.66%
3 months Mudharaba	54.41%	45.59%	58.58%	41.42%
6 months Mudharaba	49.31%	50.69%	55.30%	44.70%
12 months Mudharaba	29.50%	70.50%	37.99%	62.01%
18 months Mudharaba	23.28%	76.72%	80.55%	19.45%
24 months Mudharaba	21.15%	78.85%	25.63%	74.37%
36 months Mudharaba	14.70%	85.30%	12.22%	87.78%

* Includes savings, Al Waffer and Call Mudaraba accounts.

During the year, average mudarib share as a percentage of total income allocated to IAH was 41.82% (2017: 41.86%) as against the average mudarib share contractually agreed with IAH. Hence the Group sacrificed average mudarib fees of 20.38% (2017: 16.94%).

The Group does not share profits resulting from the assets funded through current accounts and other funds received on the basis other than mudarba contract.

The funds raised from IAH are deployed in the assets on a priority basis after setting aside certain amount in cash and placement with Banks for liquidity management purposes.

18. SHARE CAPITAL

	31 December 2018	31 December 2017
Authorised:		
3,000,000,000 ordinary shares of BD 0.100 each	300,000	300,000
Issued and fully paid up:		
1,050,000,000 ordinary shares (2017: 1,050,000,000) of BD 0.100 each	105,000	105,000

The Group has only one class of equity shares and the holders of these shares have equal voting rights. At 31 December 2018, the Group holds 101,081,714 as treasury shares (2017: 90,644,113 shares).

Names and nationalities of the major shareholders and the number of equity shares held in which they have an interest of 5% or more of outstanding shares:

	Nationality	Number of shares	% of total outstanding shares
GFH Financial Group *	Bahrain	493,490,918	47.00
Goldilocks Investment Company Limited	UAE	104,779,110	9.98
Khaleeji Commercial Bank B.S.C	Bahrain	98,334,755	9.37
Emirates Islamic Bank PJSC	UAE	88,322,425	8.41

* As at 31 December 2018, these shares representing 47% (2017: 47%) were held by KHCB Asset Company on behalf of GFH Financial Group, which is considered as the parent of the Bank for financial reporting purposes.

Commitments and financial guarantees	(135)	-
	6,288	7,470

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

23. SHARE-BASED EMPLOYEE INCENTIVE SCHEME

The Group has incorporated a Trust, Khaleeji Commercial Bank Employee Benefit Trust ("Trust"), to hold the beneficial interest of the shares under the scheme. Prior to this the shares were held in Hawafiz Khaleeji Management Company BSC (c).

The shareholders, in their annual general meeting held on 30 March 2015, approved the employee share based incentive scheme (the "scheme") which is in line with the CBB's Sound Remuneration Practices. Under the share incentive scheme, certain covered employees are granted the Group's shares as compensation for their performance.

As per the scheme, the share awards from each performance year will vest immediately but will be released over three years period from the date of grant. The share awards are subject to an additional retention period of six months from the date of completion of deferred period, after which the employee is unconditionally allowed to sell the shares in the market. The scheme allows the Bank Nomination, Remuneration and Governance Committee ("BNRGC") to determine that, if appropriate, un-awarded shares can be forfeited or clawed back in certain situations.

As at 31 December 2018, 2,746,957 shares were held by the Trust (2017: 4,643,765 shares were held by Hawafiz). During the year 917,628 shares (2017: 1,091,962 shares) shares were awarded to the employees as awards under the terms of the scheme subject to a three year deferment period. During the year the Group transferred 1,896,808 shares (2017: 1,633,866 shares) to the employees.

24. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS IN APPLYING ACCOUNTING POLICIES

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectation of future events that are believed to be reasonable under the circumstances.

Judgements

Applicable to 2018 only

- Establishing the criteria for determining whether credit risk on an exposure subject to credit risk has increased significantly since initial recognition, determining methodology for incorporating forward looking information into measurement of ECL and selection and approval of models used to measure ECL is set out in Note 5(k) and Note 34.

Applicable to 2018 and 2017

Classification of investments

In the process of applying the Group's accounting policies, management decides on acquisition of an investment whether it should be classified as 1) debt type instruments carried at fair value through equity or at amortised cost, or 2) equity-type instruments carried at fair value through equity or at fair value through income statement. The classification of each investment reflects the management's intention in relation to each investment and is subject to different accounting treatments based on such classification (refer note 5 (c) (i)).

Estimations

Applicable to 2018 only

Impairment of financing assets at amortised cost

Determining inputs into ECL measurement model including incorporation of forward looking information is set out in Note 5(k) and Note 34.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

24. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS IN APPLYING ACCOUNTING POLICIES (CONTINUED) *Estimations (Continued)*

Applicable to 2018 and 2017

Impairment of equity investments at fair value through equity

The Group determines that equity securities carried at fair value are impaired when there is an objective evidence of impairment and there has been a significant or prolonged decline in the fair value below its cost. This determination of what is significant or prolonged requires judgment.

In case of quoted equity securities, the Group considers a decline of more than 30% in the fair value below cost to be significant and considers a decline below cost which persists for more than 9 months as prolonged.

For unquoted equity investments carried at cost less impairment, the Group makes an assessment of whether there is an objective evidence of impairment for each investment by assessment of financial and other operating and economic indicators. Impairment is recognised if the estimated recoverable amount is assessed to be below the cost of the investment. It is reasonably possible, based on existing knowledge, that the current assessment of impairment could require a material adjustment to the carrying amount of the investments within the next financial year due to significant changes in the assumptions underlying such assessments.

Determining fair value of unquoted equity securities

The Group determines the fair value of unquoted investments by using valuation techniques. This includes using recent arm's length transactions between knowledgeable, willing parties (if available), discounted cash flow analysis or market multiples for similar instruments. Fair value estimates are made at a specific point in time, based on market conditions and information about the investee companies. These estimates involve uncertainties and matters of significant judgement and therefore, cannot be determined with precision. There is no certainty about future events (such as continued operating profits and financial strengths). It is reasonably possible, based on existing knowledge, that outcomes within the next financial year that are different from assumptions could require a material adjustment to the carrying amount of the investments.

Significant judgment is required to be made by the Group and the Board of Directors in the selection of an approach that would reflect the best measure of fair value of the investments. The choice of the models used for valuation on each reporting period may have a significant impact on the fair value of investments and the amounts reported in the consolidated financial statements. The Group has adopted price earning multiple approach for valuation of its unquoted equity security.

The potential effect of using reasonable possible alternative assumptions for valuing the investments resulting in 5% decrease/increase in the market multiple would increase/decrease the reported fair value by BD 657 thousand (31 December 2017: BD 657 thousand). The corresponding impact would be on the profit or loss reported by the Group.

25. ASSETS UNDER MANAGEMENT

The Group provides corporate administration, investment management and advisory services to its investment entities, which involves making decisions on behalf of such entities. Assets that are held in such capacity are not included in these consolidated financial statements. At the reporting date, the Group had assets under management of BD 230.72 million (31 December 2017: BD 240.97 million). During the year, the Group has not charged any management fees (2017: BD Nil) for the management of these assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

26. RELATED PARTY TRANSACTIONS

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Related parties include the parent company, other significant shareholders and entities over which the Group and the shareholders exercises significant influence, directors, sharia board members and executive management of the Group.

Details of Directors' interests in the Bank's ordinary shares as at the end of the year were:

Categories*	Number of Shares	Number of Directors
Less than 1%	1,050,763	1

* Expressed as a percentage of total outstanding shares of the Bank.

Compensation of key management personnel

Key management personnel of the Group comprise of the Board of Directors and key members of management having authority and responsibility for planning, directing and controlling the activities of the Group.

The key management personnel compensation during the year is as follows:

	2018	2017
Board member fees and allowances	391	314
Salaries and other short-term benefits	1,402	1,328

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

26. RELATED PARTY TRANSACTIONS (CONTINUED)

The related party balances and transactions (except for compensation of key managerial personnel) included in these consolidated financial statements are as follows:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

27. EARNINGS PER SHARE

Basic earnings per share is calculated by dividing the profit for the year by the weighted average number of equity shares outstanding during the year adjusted for impact arising from shares issued under the employee share incentive scheme.

Basic EPS	2018	2017
Profit attributable to parent for the year (BD 000's)	659	1,969
Weighted average number of equity shares (Nos. in 000's)	956,400	963,071
Basic earnings per share (in fils)	0.69	2.04

The Group did not have any dilutive instruments as of 31 December 2018 and December 2017.

28. SHARI'A SUPERVISORY BOARD

The Group's Shari'a Supervisory Board consists of three Islamic scholars who review the Group's compliance with general Shari'a principles and specific fatwas, rulings and guidelines issued. Their review includes examination of evidence relating to the documentation and procedures adopted by the Group to ensure that its activities are conducted in accordance with Islamic Shari'a principles.

29. ZAKAH

Zakah is directly borne by the shareholders on distributed profits and investment account holders. The Group currently does not collect or pay Zakah on behalf of its shareholders and investors in restricted investment accounts. Zakah payable by the shareholders is computed by the Group on the basis of the method prescribed by the Group's Shari'a Supervisory Board and notified to shareholders annually. During the year, the Shari'a Supervisory Board has computed Zakah payable of BD 191 thousand (2017: BD 556 thousand) of which BD 187 thousand (2017: 431 thousand) represents the Zakah computed on the statutory reserve and cumulative retained earnings as at 31 December 2018, payable by the Group. The remaining Zakah balance amounting to BD 4 thousand or 0.4 fils per share (2017: BD 125 thousand or 12 fils per share) is due and payable by the shareholders. The Group will pay Zakah of BD 0.4 thousand (2017: BD 11 thousand) on the treasury shares held as of 31 December 2018 based on 0.4 fils per share.

30. SEGMENT REPORTING

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, whose operating results are regularly reviewed by the Group's chief operating decision maker (Board of Directors) to make decisions about resource allocation to each segment and assess its performance and for which discrete financial information is available. An operating segment is divided into business segment and geographic segments. For management purposes, the Group is organised into two major business segments:

Corporate and retail banking

Providing customer services such as accepting Mudaraba deposits, savings account and current account facilities, fund transfer facilities, bill payment facilities. It also provides financing facilities (in the form of Commodity Murabaha, Musharaka, Istisna'a and Ijarah facilities) to corporate clients and High-Networth-Individuals and consumer finance products. This segment includes money market and treasury services in the form of short term Commodity Murabaha and Wakala to banks, financial institutions and investments in sukuk to manage funding of the Group.

Investment banking

Primarily relates to conceptualising of investment deals and performing roles of an arranger, lead manager, and administrator of the funds (involves structuring of deals, raising of funds through private placement and fund administration). Also offers products like Restricted Investment Accounts (RIA) and management of funds raised through the RIA structures. Also involves carrying out strategic investments in the form of equity contribution (either in the funds created and managed by the Group or other institutions).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

30. SEGMENT REPORTING (CONTINUED)

Segment performance is measured based on results for each department as mentioned in the internal management reports that are reviewed by the Board of directors on a quarterly basis. Segment results is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate in these industries.

The Group reports directly attributable revenue and cost relating to transactions originating from respective segments as segment revenue and segment cost respectively. Indirect costs and corporate overheads are treated as unallocated. The internal management reports are designed to reflect revenue and cost for respective segments which are measured against the budgeted figures.

The Group primarily operates from Bahrain and does not have any overseas branches/divisions. The geographic concentration of assets and liabilities is disclosed in note 32 (b) to the consolidated financial statements.

The Group is winding down in investment banking business.

These segments are the basis on which the Group reports its primary segment information. Transactions between segments (if any) are conducted on an arm's length basis

33. FAIR VALUE

a) Fair value of financial instruments

Fair value is an amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

The fair value of quoted Sukuk carried at amortised cost of BD 161,327 thousand (31 December 2017: BD 113,199 thousand) is BD 161,644 thousand as at 31 December 2018 (31 December 2017: BD 112,077 thousand).

In case of financing assets and lease receivables, the average profit rate of the portfolio is in line with current market rates for similar facilities and hence after consideration of adjustment for prepayment risk and impairment charges it is expected that the current value would not be materially different to fair value of these assets. Other than equity investments carried at cost of BD 36,891 thousand (2017: BD 39,056 thousand), the estimated fair values of the Group's other financial instruments are not significantly different from their carrying values due to their short-term nature.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

33. FAIR VALUE (CONTINUED)

b) Fair value hierarchy

The table below analyses the financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets and liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

31 December 2018	Level 1	Level 2	Level 3	Total
Unquoted equity type securities carried at fair value through income statement	-	-	13,148	13,148
	-	-	13,148	13,148

31 December 2017	Level 1	Level 2	Level 3	Total
Unquoted equity type securities carried at fair value through income statement	-	-	13,148	13,148
	-	-	13,148	13,148

The table below shows the reconciliation of movements in value of investments measured using Level 3 inputs:

	2018	2017
At 1 January	13,148	15,148
Fair value loss in income statement	-	(2,000)
At 31 December	13,148	13,148

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

34. RISK MANAGEMENT

Introduction and overview

The Group has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risks
- operational risks

This note presents information about the Group's exposure to each of the above risks, its objectives, policies and processes for measuring and managing risk, and the Group's management of capital.

Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The Board has established various committees with responsibilities for managing the overall risks associated with the Group. The committees also continuously monitor consistent implementation of the Board approved policies in the Group and report deviations, if any, to the Board. The committees consist of heads of business and other functional units in the Group. The committees comprise the following: Management Committee (operational risks), Executive Credit and Investment Committee (credit and investment risks), and Assets and Liabilities Committee (market and capital risks). In addition to the Committees, the Board has established an independent Risk Management Department with an overall responsibility to identify, measure, control risks and recommend policies and corrective actions. Risk Management Department reports directly to the Board Audit and Risk Management Committee.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions, products and services offered. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment, in which all employees understand their roles and obligations.

The Group's Audit and Risk Management Committee is responsible for monitoring compliance with the risk management policies and procedures, and for reviewing the adequacy of the risk management framework in relation to the risks faced by the Group. The Audit and Risk Management Committee is assisted in these functions by Internal Audit. Internal Audit undertakes both regular and ad-hoc reviews of risk management controls and procedures, the results of which are reported to the Audit and Risk Management Committee.

CREDIT RISK

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's exposures to placements with financial institutions, financing assets, assets acquired for leasing (including lease rental receivable), investment in sukuk and other receivables. For risk management reporting purposes, the Group considers and consolidates all elements of credit risk exposure (such as individual and group exposure risk, country and sector concentration risk, related party exposure, etc.).

The Group manages its credit risks through its various business units, an independent Risk Management Department, Board Audit & Risk Management Committee ("BARMC"), and the Executive Credit & Investment Committee ("ECICOM"). The Credit risk management framework comprises the following:

- Formulating credit risk strategies, policies and risk appetite which are developed after careful assessment of the market, capital requirement, regulatory rules, and the Board's risk appetite. The risk strategies and risk appetites are coded into policies approved by the Board. The Group's credit policy framework includes, inter alia, the following: in consultation with business units, credit risk management framework, credit risk mitigations, credit risk rating, credit risk pricing, expected credit loss, cross border business policy, personal finance product programs, approval authorities' matrix, and many others.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

34. RISK MANAGEMENT (CONTINUED) CREDIT RISK (CONTINUED)

- Credit granting process. All credit exposures are assumed after careful assessment of the risks. Business proposals are initiated by the business units through formal credit applications. Such credit application provide adequate information about the proposed exposure including description of possible risks and mitigating factors. All credit applications are independently reviewed by Credit Review Unit to assess the adequacy of the due diligence conducted, independent assessment of the risks and mitigants, ensure compliance with limits and policies. Credit Review Unit issue formal opinion in respect of the proposals which may include recommendations for enhancing the Group's position. Proposals are then presented to approving authorities for their considerations (see proceeding point below). Where applicable and necessary, credit applications are also independently reviewed by the Sharia Compliance Officer to ensure adherence to Islamic principles.
- Establishing the authorisation structure for the approval and renewal of credit facilities. Approval authorities are documented in the Credit Authorities Policy of the Group which describes the various approval authorities, conditions, and limits for approving business transactions arising from investment and credit activities within the Group. There are 5 main levels of credit and investment authorities within the Group: Board of Directors, Board Investment & Credit Committee, Executive Credit & Investment Committee, Chief Executive Officer, and Heads of Business Units. Approval authorities are decided based on the magnitude of the risk and transactions size while at the same time allowing for smooth business operations.
- Managing concentrations. The Group places significant emphasis on diversifying its portfolio through applying a portfolio strategy in which the Group spreads its assets and liabilities' businesses so that results from volatility or fluctuations in such businesses become subdued, controlled, and assist in the consistent long-term growth of the shareholders' interests. An important element of such portfolio strategy is to establish limits within which the Management may conduct business. In principle, the Group shall adhere to all maximum limits established by regulatory authorities. At the same time, the Group has defined its own internal limits to control the following: Credit risk concentration, Counterparty limits, Industry limits, Country limits, Collateral concentration limits, Product mix, Maturity limits, amongst others. These internal limits are reviewed on periodic basis taking into considerations the following factors: The Group's risk appetite, Business and budget plans, Counterparty's risk rating, Risk rating of the Counterparty's country, The Group's financial positions including liquidity and Capital adequacy, General market condition; and other factors as determined by the Board of Directors or the Board Audit & Risk Management Committee. In general, the Group adopts a negative correlation between risks and limits in that lower limits are defined for higher risks.
- Credit Measurement Methodologies. The Group quantifies its credit risk using two main metrics: expected loss (EL) and economic capital (EC). The expected loss reflects the average value of the estimated losses (i.e. the cost of the business) and is associated with the Group's policy on provisions, while economic capital is the amount of capital necessary to cover unexpected losses (i.e. if actual losses are higher than expected losses). As part of its measurement techniques, the Group conducts adequate stress testing on its portfolio.
- Credit risk rating. An important tool in monitoring the quality of individual credits, as well as the total portfolio, is the use of Credit Risk Rating systems. The Group adopts a well-structured internal CRR system as a mean of differentiating the degree of credit risk in the different credit exposures of the Group to allow more accurate determination of the overall characteristics of the asset portfolio, concentrations, limits management, problem assets, pricing, and the adequacy of loss reserves (provisions). As well as identifying the risks associated with a counterparty and a credit facility, CRRs provide a key input for the capital charges and risk weights. The Group's approach to credit risk rating is documented in the Credit Risk Rating Policy which aims at achieving the following: (a) create a benchmark for assessing relative creditworthiness of the graded entity and measure credit risk in relation to the market, (b) arrive at a system of risk-based pricing for credit facilities granted by the Group, (c) monitor the overall credit risk inherent in the Group's Credit portfolio, (d) create a benchmark for recognition of accrued income on credit assets, (e) link asset review frequency and approval authority levels to Credit risk and emphasize focus on effective management of weak assets, and (f) provide a means to link Internal Capital Adequacy to the portfolio credit risk.
- Classifications and identification of non-performing exposures. The Group has adopted FAS 30 / IFRS 9 standards for classifying exposures into three stages. Accounts are moved into higher staging depending on occurrence of Significant Increase in Credit Risks. Exposures with past due exceeding 90 days are classified as non-performing.
- Remedial management. All credit exposures assumed by the Group are considered after thorough risk and reward analysis adequate for the size and nature of business being considered. However, despite all due diligence exercised to minimize the risks involved, it is inevitable that certain exposures may experience setbacks due to various reasons such as: fundamental changes in the market conditions, changes in regulations and laws, changes in the status of counterparties (such as death,

34. RISK MANAGEMENT (CONTINUED) CREDIT RISK (CONTINUED)

loss of job, sanctions, seizure of business, or bankruptcy), delays in deliverables (such as delays in completion of projects), or Unintentional errors in the initial assumptions. From business impact point of view, such exposures would have high costs due to suspension of profits, provisioning, liquidity, reputational, or opportunity costs. To prevent such adverse business impact, the Group has developed a prudent remedial strategy appropriate for the size, nature, and delinquency period. Such strategy is documented in the Remedial Management Policy. The Group, through its Remedial and Collection department pursue various recovery techniques including: dunning, rescheduling, restructuring, collateral foreclosure, legal actions, and cash settlement amongst others.

Significant increase in credit risk

When determining whether the risk of default on a financial instrument and assets acquired for leasing has increased significantly since initial recognition, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and expert credit assessment and including forward-looking information.

In determining whether credit risk has increased significantly since initial recognition, the following criteria are considered:

- 1 Downgrade in risk rating according to the approved ECL policy;
- 2 Facilities restructured during previous twelve months;
- 3 Qualitative indicators; and
- 4 Facilities overdue by 30 days as at the reporting date subject to rebuttal in deserving circumstances

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

34. RISK MANAGEMENT (CONTINUED) CREDIT RISK (CONTINUED)

Credit risk grades

The Group allocates each exposure to credit risk grade based on a variety of data that is determined to be predictive of the risk of default and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of borrower.

Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates so, for example, the difference in risk of default between credit risk grades 1 and 2 is smaller than the difference between credit risk grades 2 and 3.

Each exposure is allocated to a credit risk grade at initial recognition based on available information about the borrower. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. Exposers are rated 1 to 10 with 1 to being good and 7 being watch list and 8, 9 and 10 default grades. The monitoring typically involves use of the following data.

Corporate exposures

- Information obtained during periodic review of customer files- e.g. audited financial statements, management accounts, budgets and projections. Examples of areas of particular focus are: gross profit margins, financial leverage ratios, debt service coverage, compliance with covenants, quality of management, senior management changes
- Data from credit reference agencies, press articles, changes in external credit ratings
- Quoted bond and credit default swap (CDS) prices for the borrower where available
- Actual and expected significant changes in the political, regulatory and technological environment of the borrower or in its business activities

Retail exposures

- Internally collected data on customer behaviour -e.g. utilisation of credit card facilities
- Affordability metrics
- External data from credit reference agencies including industry-standard credit scores

All exposures

- Payment record this includes overdue status as well as a range of variables about payment ratios
- Utilisation of the granted limit
- Requests for and granting of forbearance
- Existing and forecast changes in business, financial and economic conditions

Generating the term structure of PD

Credit risk grades are a primary input into the determination of the term structure of PD for exposures. The Group collects performance and default information about its credit risk exposures analyzed by jurisdiction or region and by type of product and borrower as well as by credit risk grading.

The Group employs statistical models to analyze the data collected and generate estimates of the remaining lifetime PD of exposures and how these are expected to change as a result of the passage of time.

This analysis includes the identification and calibration of relationships between changes in default rates and changes in key macro-economic factors as well as in-depth analysis of the impact of certain other factors (e.g. forbearance experience) on the risk of default. For most exposures, key macro-economic indicators include: GDP growth, benchmark profit rates and oil price. For exposures to specific industries and/or regions, the analysis may extend to relevant commodity and/or real estate prices.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

34. RISK MANAGEMENT (CONTINUED) CREDIT RISK (CONTINUED) *Generating the term structure of PD (Continued)*

Based on advice from the Risk Management Department and economic experts and consideration of a variety of external actual and forecast information, the Group formulates a 'base case' view of the future direction of relevant economic variables as well as a representative range of other possible forecast scenarios (see discussion below on incorporation of forward-looking information). The Group then uses these forecasts to adjust its estimates of PDs.

Determining whether credit risk has increased significantly

The criteria for determining whether credit risk has increased significantly vary by portfolio and include quantitative changes in PDs and qualitative factors, including a backstop based on delinquency.

Using its expert credit judgement and, where possible, relevant historical experience, the Group may determine that an exposure has undergone a significant increase in credit risk based on particular qualitative indicators that it considers are indicative of such and whose effect may not otherwise be fully reflected in its quantitative analysis on a timely basis.

Qualitative indicators, including different criteria used for different portfolios credit cards and commercial real estate.

As a backstop, the Group considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the borrower.

The Group monitors the effectiveness of the criteria used to identify significant increases in credit risk by regular reviews to confirm that:

- the criteria are capable of identifying significant increases in credit risk before an exposure is in default;
- the criteria do not align with the point in time when an asset becomes 30 days past due; and
- there is no unwarranted volatility in loss allowance from transfers between 12-month PD (stage 1) and lifetime PD (stage 2).

Definition of default

The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the borrower is more than 90 days past due on any material obligation to the Group.
- It is becoming probable that the borrower will restructure the asset as a result of bankruptcy due to the borrower's inability to pay its credit obligation.

In assessing whether the borrower is in default, the Group considers qualitative and quantitative indicators. The definition of default aligns with that applied by the Group for regulatory capital purposes.

Incorporation of forward looking information

The Group incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL. Based on advice from the Assets and Liabilities Committee ("ALCO") and economic experts and consideration of a variety of external actual and forecast information, the Group formulates a 'base case' view of the future direction of relevant economic variables as well as a representative range of other possible forecast scenarios. This process involves developing two or more additional economic scenarios and considering the relative probabilities of each outcome.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

34. RISK MANAGEMENT (CONTINUED) CREDIT RISK (CONTINUED)

Incorporation of forward looking information (Continued)

External information includes economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Group operates, supranational organisations such as the OECD and the International Monetary Fund, and selected private-sector and academic forecasters.

The base case represents a most-likely outcome and is aligned with information used by the Group for other purposes such as strategic planning and budgeting. The other scenarios represent more optimistic and more pessimistic outcomes. Periodically, the Group carries out stress testing of more extreme shocks to calibrate its determination of these other representative scenarios.

The Group has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses. The economic scenarios used as at 31 December 2018 included the key indicators for the selected countries such as the unemployment rates, interest rates and the GDP growth.

Modified financial assets and assets acquired for leasing

The contractual terms of a financing asset and assets acquired for leasing may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer.

When the terms of a financial asset are modified and the modification does not result in derecognition, the determination of whether the asset's credit risk has increased significantly reflects comparison of:

- Its remaining lifetime PD at the reporting date based on the modified terms; with
- The remaining lifetime PD estimated based on data at initial recognition and the original contractual terms.

The Group renegotiates financing to customers in financial difficulties (referred to as 'forbearance activities') to maximise collection opportunities and minimise the risk of default. Under the Group's forbearance policy, forbearance of financing assets is granted on a selective basis if the debtor is currently in default on its debt or if there is a high risk of default, there is evidence that the debtor made all reasonable efforts to pay under the original contractual terms and the debtor is expected to be able to meet the revised terms.

The revised terms usually include extending the maturity, changing the timing of profit payments and amending the terms of loan covenants. Both retail and corporate financings are subject to the forbearance policy.

Generally, forbearance is a qualitative indicator of a significant increase in credit risk and an expectation of forbearance may constitute evidence that an exposure is credit-impaired / in default (refer Note 5). A customer needs to demonstrate consistently good payment behaviour over a period of time (12 months) before the exposure is no longer considered to be credit-impaired/ in default or the PD is considered to have decreased such that the loss allowance reverts to being measured at an amount equal to 12-month ECL.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive). ECLs are discounted at the effective profit rate of the financial asset.

The key inputs into the measurement of ECL are the term structure of the following variables:

- probability of default (PD);
- loss given default (LGD);
- exposure at default (EAD).

These parameters are generally derived from internally developed statistical models and other historical data. They are adjusted to reflect forward-looking information as described above.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

34. RISK MANAGEMENT (CONTINUED) CREDIT RISK (CONTINUED) Measurement of ECLs (Continued)

PD estimates are estimates at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. These statistical models are based on internally compiled data comprising both quantitative and qualitative factors. Where it is available, market data may also be used to derive the PD for large corporate counterparties. If a counterparty or exposure migrates between rating classes, then this will lead to a change in the estimate of the associated PD.

LGD is the magnitude of the likely loss if there is a default. The Group estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. For financing assets secured by retail property, LTV ratios are a key parameter in determining LGD. They are calculated on a discounted cash flow basis using the effective interest rate as the discounting factor.

EAD represents the expected exposure in the event of a default. The Group derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract including amortisation. The EAD of a financial asset is its gross carrying amount. For lending commitments and financial guarantees, the EAD includes the amount drawn, as well as potential future amounts that may be drawn under the contract, which are estimated based on historical observations.

The following tables show reconciliations from the opening to the closing balance of the loss allowance: 12-month ECL, lifetime ECL and credit-impaired.

	12 month ECL (Stage 1)	Lifetime ECL not credit impaired (Stage 2)	Lifetime ECL credit impaired (Stage 3)	Total 2018

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

34. RISK MANAGEMENT (CONTINUED) CREDIT RISK (CONTINUED)

Impaired financial assets

Impaired financial assets are those for which the Group determines that it is probable that it will be unable to collect all or part of the principal and profit due according to the contractual terms of the exposure and these fall under risk grades 8, 9 and 10. For other financial assets impairment is assessed on an individual basis for each exposure by considering various factors.

Past due but not impaired exposures

The exposure pertains to financing assets where contractual profit or principal payments are past due but the Group believes that impairment is not appropriate on the basis of subsequent collections, the level of security / collateral available and / or the stage of collection of amounts owed to the Group.

Renegotiated facilities

During the year, facilities of BD 16,896 thousands (2017: BD 25,160 thousand) were renegotiated, out of which BD 8,806 thousand (2017: BD 2,000 thousand) are classified as neither past due nor impaired as of 31 December 2018. The renegotiated terms usually require settlement of profits accrued till date on the facility and/or part payment of the principal and/or obtaining of additional collateral coverage. The renegotiated facilities are subject to revised credit assessments and independent review by the RMD. Of the total past due facilities of BD 142,895 thousand (2017: BD 117,168 thousand) only instalments of BD 39,269 thousand (2017: BD 13,352 thousand) are past due as at 31 December 2018.

Allowances for impairment

The Group makes provisions for impairment on individual assets classified under grades 8,9 and 10. This is done on the basis of the present value of projected future cash flows from the assets themselves and consideration of the value of the collateral securities available. On a collective basis, the Group has provided for impairment losses based on management's judgment of the extent of losses incurred but not identified based on the current economic and credit conditions.

Non-accrual basis

Group classifies financing facility/Sukuk as non-accrual status, if the facility/Sukuk is past due greater than 90 days or there is reasonable doubt about the collectability of the receivable amount. The profits on such facilities are not recognized in the income statement until there are repayments from the borrower or the exposure is upgraded to regular status.

Write-off policy

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. The Group expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due. During the year, the Group has written off financing facilities amounting to BD 1,566 thousand (2017: BD 13,228 thousand) which were fully impaired. The Group has recovered BD 99 thousand from a financing facility written off in previous years (2017: 38 thousand).

Collaterals

The Group holds collateral against financing assets and receivables from assets acquired for leasing in the form of mortgage/ pledge over property, listed securities, other assets and guarantees. Estimates of fair value are based on the value of collateral assessed at the time of borrowing. Valuation of collateral is updated when the loan is put on a watch list and the loan is monitored more closely. Collateral generally is not held against exposure to other banks and financial institutions. An estimate of the fair value of collateral and other security enhancements held against financial assets is shown below. This includes the value of financial guarantees from banks, but not corporate and personal guarantees as the values thereof are not readily quantifiable. The collateral values considered for disclosure are restricted to the extent of the outstanding exposures.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

34. RISK MANAGEMENT (CONTINUED) CREDIT RISK (CONTINUED) Collaterals (Continued)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

34. RISK MANAGEMENT (CONTINUED) CREDIT RISK (CONTINUED)

Settlement risk

The Group's activities may give rise to risk at the time of settlement of transactions and trades. Settlement risk is the risk of loss due to the failure of a company to honour its obligations to deliver cash, securities or other assets as contractually agreed.

Settlement limits form part of the credit approval / limit monitoring process described earlier. Acceptance of settlement risk on free settlement trades requires transaction specific or counterparty specific approvals from RMD.

LIQUIDITY RISK

Liquidity risk is the risk that the Group will encounter difficulty in meeting obligations associated with its financial liabilities that are settled by delivering cash or another financial assets.

Management of liquidity risk

The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Financial Control Department (FCD) collates data from treasury and other business units regarding the liquidity profile of their financial assets and liabilities and details of other projected cash flows arising from projected future business. FCD communicates the information to the treasury who manages the Group's portfolio of short-term liquid assets, largely made up of short-term placements with other banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Group as a whole.

The daily liquidity position is monitored by FCD. The Group has in place a Liquidity Contingency Plan, the elements of which are periodically tested. Tools for implementation of regular stress testing under various scenarios are in place. All liquidity policies and procedures are subject to review by ALCO and approval by appropriate authorities. A summary report, including any exceptions and remedial action taken, is submitted regularly to ALCO members.

Exposure to liquidity risk

The key measure used by the Group for managing liquidity risk is the ratio of net liquid assets to deposits from customers. For computation of this, net liquid assets are considered as including cash and bank balances and placements with financial Institutions and investments in sukuk net of sukuk pledged against medium-term borrowing less placements from financial institution, and deposits comprise current accounts, placements from non-financial institutions and individuals, and equity of investment account holders.

Details of the reported Group ratio of net liquid assets to deposits and customers current accounts at the reporting date and during the reporting period were as follows:

	2018	2017
	%	%
At 31 December	16.79	9.3
Average for the period	13.09	18.26
Maximum for the period	19.55	29.97
Minimum for the period	6.60	5.15

For maturity profile of assets and liabilities refer note 31.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

34. RISK MANAGEMENT (CONTINUED)

MARKET RISK

Market risk is the risk that changes in market prices, such as profit rate, equity prices, foreign exchange rates and credit spreads will affect the Group's income, future cash flows or the value of its holdings of financial instruments. Market risk comprises three types of risk: currency risk, profit rate risk and other price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

Management of market risks

The Group separates its exposure to market risk between trading and non-trading portfolios. The Group has no trading positions in equity or commodities and the main source of market risk for the Group is its foreign exchange exposure and profit rate gap.

The Group does not do any trading in foreign exchange. The Group does not engage in proprietary trading of foreign exchange derivatives. All foreign exchange income/ losses arising out of customer transactions and revaluation of statement of financial position assets and liabilities are booked by the treasury operations. The responsibility for monitoring and managing the related risks also rests with the Treasury department.

Overall authority for market risk management is vested with ALCO. The RMD is responsible for the development of detailed risk management policies (subject to review and approval by appropriate approval authorities) and the Financial Control Department is responsible for the day-to-day review of their implementation.

Exposure to profit rate risk–non–trading portfolios

The principal risk to which non-trading portfolios are exposed is the risk of loss from fluctuations in the future cash flows or fair values of financial instrument because of a change in market profit rates. Profit rate risk is managed principally through monitoring profit rate gaps and by having pre-approved limits for re-pricing bands. The ALCO is the monitoring body for compliance with these limits and is assisted by the Group's Risk Management Department in its day-to-day monitoring activities.

A summary of the Group's profit rate gap position at 31 December 2018 is as follows:

31 December 2018	Up to 3 months	3 to 6 months	6 months - 1 year	1 to 3 years	More than 3 years	Total
Assets						
Placements with financial institutions	42,590	-	1,047	-	-	43,637

Total profit rate sensitive liabilities and investment accounts	291,259	90,538	124,900	81,338	1	588,036
Profit rate gap	(207,119)	(78,256)	(70,166)	(10,582)	385,690	19,567

The management of profit rate risk against profit rate gap limits is supplemented by monitoring the sensitivity of the Group's financial assets and liabilities to various standard and non-standard profit rate scenarios. Standard scenarios that are considered on a monthly basis include a 100 basis point (bp) parallel fall or rise across all yield curves and a 50 bp rise or fall of all yield curves.

An analysis of the Group's sensitivity to an increase or decrease in market profit rates (assuming no asymmetrical movement in yield curves and a constant statement of financial position position) is as follows:

	100bp parallel increase / decrease	50bp increase / decrease
At 31 December 2018	±149	±67
At 31 December 2017	±196	±98

Overall non-trading profit rate risk positions are managed by Treasury department, which uses short term investment securities, placement with banks and placement from banks to manage the overall position arising from the Group's non-trading activities.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

34. RISK MANAGEMENT (CONTINUED) MARKET RISK (CONTINUED)

Exposure to foreign exchange risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Group had the following significant net exposures denominated in foreign currency as of 31 December.

	2018 BHD Equivalent	<i>2017 BHD Equivalent</i>
US Dollars*	28,905	12,236
Other GCC Currencies *	20,226	(7,707)
Euros	(402)	(297)
Australian Dollars	4,627	4,607
Kuwaiti Dinars	3,379	3,544
Sterling Pounds	(579)	480
Indian Rupee	38	9

(*) The exposure in US dollars and other GCC currencies does not create any foreign exchange risk for the Group since Bahrain Dinars and other GCC currencies except for Kuwaiti Dinars are effectively pegged to the US Dollars.

The management of foreign exchange risk against net exposure limits is supplemented by monitoring the sensitivity of the Group's financial assets and liabilities to various foreign exchange scenarios. Standard scenarios that are considered on a monthly basis include a 5% plus/minus increase in exchange rates, for currencies other than US Dollars, other GCC currencies.

An analysis of the Group's sensitivity to an increase or decrease in foreign exchange rates (assuming all other variables, primarily profit rates, remain constant) is as follows:

	2018 BHD Equivalent	<i>2017 BHD Equivalent</i>
Euros	±20	±15
Australian Dollars	±231	±230
Kuwaiti Dinars	±169	±177
Sterling Pounds	±29	±24
Indian Rupees	±2	-

Exposure to other price risks–non–trading portfolios

Credit spread risk on debt securities is subject to regular monitoring by RMD, but is not currently significant in relation to the overall financial position of the Group.

The Group's unquoted equity securities carried at cost are exposed to risk of changes in equity values. Refer to note 24 for significant estimates and judgments in relation to impairment assessment of unquoted equity investments carried at cost. The Group manages exposure to other price risks by actively monitoring the performance of the equity securities. The performance assessment is performed on a quarterly basis and is reported to the Board Investment and Credit Committee.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

34. RISK MANAGEMENT (CONTINUED)

OPERATIONAL RISK

Operational risk is the risk of loss arising from systems and control failures, fraud and human errors, which can result in financial and reputation loss, and legal and regulatory consequences. The Group manages operational risk through appropriate controls, instituting segregation of duties and internal checks and balances, including internal audit and compliance. The Risk Management Department is in charge of identifying, monitoring and managing operational risk in the Group. The Group already has an approved policy for doing this and all required organisational and physical infrastructure are in place.

The Group has completed conducting one cycle of Risk Control Self-Assessment (RCSA) of Operational risk for majority of the departments of the Group to identify the important Key Risk Areas, Key Risk Indicators and Key Risk Triggers. Furthermore for the remaining departments Key Risk Areas have been identified and the next process will be the identification of Key Risk Indicators and Key Risk Triggers. The RCSA process is a continuous process and will be conducted at regular frequencies across the Group. It will be an annual process to review all the KRI's. A software for monitoring these triggers and recording actual and near miss losses is already in place. The medium term objective of the Group is to generate statistically reliable data to upgrade to more sophisticated modes of Operational Risk Control both to manage the risk better and to reduce capital commitment.

CAPITAL MANAGEMENT

The Central Bank of Bahrain (CBB) sets and monitors capital requirements for the Group as a whole. In implementing current capital requirements CBB requires the Group to maintain a prescribed ratio of total capital to total risk-weighted assets. The capital adequacy regulations of CBB is based on the principles of Basel III of the IFSB guidelines.

The Group's regulatory capital is analysed into two tiers:

- *Tier 1 capital: includes CET1 and AT1.*

CET1 comprise of ordinary share capital that meet the classification as common shares for regulatory purposes, disclosed reserves including share premium, general reserves, legal / statutory reserve, common shares issued by consolidated banking subsidiaries of the Bank and held by third parties, retained earnings after regulatory adjustments relating to goodwill and items that are included in equity which are treated differently for capital adequacy purposes.

AT1 comprise instruments issued by consolidated banking subsidiaries of the Bank held by third parties which meet the criteria of AT1, and regulatory adjustments applied in calculation of AT1.

- *Tier 2 capital, includes instruments issued by the Bank that meet the criteria for inclusion in Tier 2 capital, stock surplus resulting from issue of Tier 2 capital, instruments issued by consolidated banking subsidiaries of the Bank held by third parties that meet the criteria for inclusion in Tier 2, general provisions held against unidentified losses on financing and qualify for inclusion within Tier 2, asset revaluation reserve from revaluation of fixed assets and instruments purposes and regulatory adjustments applied in the calculation of Tier 2 capital.*

The regulatory adjustments are subject to limits prescribed by the CBB requirements, these deductions would be effective in a phased manner through transitional arrangements from 2016 to 2018. The regulations prescribe higher risk weights for certain exposures that exceeds materiality thresholds. These regulatory adjustments required for certain items such as goodwill on mortgage service right, deferred tax assets, cash flow hedge reserve, gain on sale of related securitization transactions, defined benefit pension fund assets and liabilities, investment in own shares and reciprocal cross holdings in the capital of Banking and financial entities, investment in the capital of Banking and financial entities that are outside the scope of regulatory consolidation and where the Group does not own more than 10% of issued common shares capital of the entity and significant investments in the capital of banking and financial entities that are outside the scope of regulatory consolidation.

As at 31 December 2018, the Group has made regulatory adjustments of BD 13,725 thousand (2017: 11,325 thousand) in line with the CBB requirements.

Banking operations are categorised as either trading book or banking book, and risk-weighted assets are determined according to specified requirements that seek to reflect the varying levels of risk attached to assets and off-balance sheet exposures.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018 / BD 000'S

34. RISK MANAGEMENT (CONTINUED) CAPITAL MANAGEMENT (CONTINUED)

The Group's regulatory capital position at 31 December was as follows:

	31 December 2018	31 December 2017
Total risk weighted exposure	653,067	683,784
Tier 1 capital:		
- CET 1 capital prior to regulatory adjustments	112,401	123,141
- Less: regulatory adjustments	(13,725)	(11,325)
CET 1 after regulatory adjustments	98,676	111,816
AT 1	-	-
Tier 2 capital:	7,286	4,419
Total regulatory capital	105,962	116,235
Total regulatory capital expressed as a percentage of total risk weighted assets	16.23%	17.00%
Liquidity coverage ratio	395.03%	111.99%
Net stable funding ratio	88.31%	196.01%
Leverage ratio	4.77	3.80

The Group has complied with all externally imposed capital requirements throughout the year.

Capital allocation

The allocation of capital between specific operations and activities is primarily driven by regulatory requirements. The Group's capital management policy seeks to maximise return on risk adjusted while satisfying all the regulatory requirements. The Group's policy on capital allocation is subject to regular review by the Board.

35. COMMITMENTS

The commitments contracted in the normal course of business of the Group:

	2018	2017
Undrawn commitments to extend finance *	33,193	48,747
Financial guarantees	12,864	18,390
	46,057	67,137

* The Group has a right to revoke the undrawn commitment to extend finance prior to expiry of its tenor.

Performance obligations

During the ordinary course of business, the Group may enter into performance obligations in respect of certain of its infrastructure development projects. It is the usual practice of the Group to pass these performance obligations, wherever possible, on to the companies that own the projects. In the opinion of the management, no liabilities are expected to materialise on the Group at 31 December 2018 due to the performance of any of its projects.

36. SOCIAL RESPONSIBILITY

The Group discharges its social responsibilities through donations to charitable causes and organisations.

37. COMPARITIVES

Certain prior year amounts have been regrouped to conform the current year's presentation. Such regrouping did not affect previously reported profit for the year or owner's equity.

RISK MANAGEMENT DISCLOSURES

(Based on Basel 3 and IFSB guidelines)
31 December 2018

These disclosures have been prepared in accordance with the Public Disclosure Module (“PD”), Section PD-1.3: Disclosures in Annual Reports, CBB Rule Book, and Volume II for Islamic Banks. To avoid any duplication, information required under PD module but already disclosed in other sections of annual report has not been reproduced. These disclosures are part of the annual report for the year ended 31 December 2018 and should be read in conjunction with the consolidated financial statements for the year ended 31 December 2018 and other sections of the annual report.

15 RISK MANAGEMENT DISCLOSURES

EXECUTIVE SUMMARY

The Central Bank of Bahrain's ("CBB") Basel III guidelines outlining the capital adequacy framework for banks incorporated in the Kingdom of Bahrain became effective from 1 January 2016. Banks are required to maintain minimum capital adequacy ratio of 12.5% on a consolidated basis [i.e. CET1 – 6.5%, AT1-1.5%, Tier 2 – 2% and CCB – 2.5%] and a capital adequacy ratio of 8% on a solo basis [i.e. CET1 – 4.5%, AT1 – 1.5% and Tier 2 – 2%]. These disclosures have been prepared in accordance with the CBB requirements outlined in the Public Disclosure Module ("PD"), Section PD-1.3: Disclosures in Annual Reports, of the CBB Rule Book, Volume II for Islamic Banks. Section PD-1.3: Disclosures in Annual Reports. Section PD-1.3 reflects the requirements of Basel II - Pillar III and the Islamic Financial Services Board's ("IFSB") recommended disclosures for Islamic banks and PD 3.1.6 highlights the requirement to make quantitative disclosures described in PD-1.3 on their web site along with the yearly financial statements.

The disclosures in this report are in addition to or in some cases, serve to clarify the disclosures set out in the consolidated financial statements for the year ended 31 December 2018, presented in accordance with the Financial Accounting Standards ("FAS") issued by the Accounting and Auditing Organisation for Islamic Financial Institutions ("AAOIFI"). To avoid any duplication, information required under PD module but already disclosed in other sections of the annual report has not been reproduced in these disclosures.

All figures presented in this section are reported in Bahraini Dinars (in thousand) and are as of 31 December 2018 unless otherwise stated.

Khaleeji Commercial Bank BSC ("the Bank" or "KHCB") has adopted the Standardised Approach for Credit Risk and Market Risk and the Basic Indicator Approach for Operational Risk to determine its capital requirements, details of which are given in section 2. This section contains a description of the Bank's risk management and capital adequacy policies and practices including detailed quantitative information on risk components and capital adequacy.

The Bank's common equity tier I (CET1), Additional tier I (AT1) and total capital adequacy ratios comply with the minimum capital requirements under the CBB's Basel III framework.

The Banks total risk weighted assets as at 31 December 2018 amounted to BD 653,067 thousand. Credit risk accounted for 89.3%, market risk 1.2% and operational risk 9.5% of the total risk weighted assets. Common equity tier I and total regulatory capital were BD 98,676 thousand and BD 105,963 thousand respectively as at 31 December 2018.

At 31 December 2018, Bank's CET1, AT1 and total adequacy ratios were 15.11% and 16.23% respectively.

15 RISK MANAGEMENT DISCLOSURES

1. GROUP STRUCTURE

The Bank operates under a retail banking license granted by the CBB on 20 October 2003. The Bank has 6 subsidiaries. These are not significant to the Bank. The subsidiaries set-up is primarily special purpose entities with nominal capital to execute specific investment transactions. The subsidiaries qualify as commercial entities as per the CBB guidelines and are risk weighted as investments for capital adequacy computation purposes, except for one entity, Hawafiz Khaleeji Management Company BSC (c), which was consolidated for capital adequacy computation.

2. INTRODUCTION TO BASEL III & RISK MANAGEMENT

The CBB has mandated that the Basel Committee on Banking Supervision's ("Basel Committee"), Basel III capital adequacy framework is applicable to all banks incorporated in the Kingdom of Bahrain from 1 January 2015. The Bank has accordingly taken steps to comply with these requirements. The Basel III framework is intended to strengthen risk management practices and processes within the financial institutions.

CBB's capital adequacy framework is based on three pillars, consistent with the Basel III framework adopted by the Basel Committee, as follows:

- Pillar I: calculation of the risk weighted assets ("RWA" or "RWA's") and capital requirement.
- Pillar II: the supervisory review process, including the Internal Capital Adequacy Assessment Process ("ICAAP").
- Pillar III: rules for disclosure of risk management and capital adequacy information.

Pillar I

Pillar I defines the regulatory minimum capital requirements for each bank to cover the credit risk, market risk and operational risk inherent in its business model. It also defines the methodology for measurement of these risks and the various elements of qualifying capital. The capital adequacy ratio is calculated by dividing the regulatory capital base by total RWA's. CBB has mandated that the ratio be maintained at a minimum of 12% and has set a trigger ratio of 12.5%. If the capital adequacy ratio falls below 12.5%, additional prudential reporting requirements apply, and a formal action plan to restore the ratio above the trigger level is to be formulated and submitted to the CBB.

The table below summarizes the Pillar I risks and the approach used by the Bank to calculate the RWA's in each case in accordance with the CBB's Basel III capital adequacy framework:

Risk Type	Approach used by the Bank
Credit Risk	Standardised Approach
Market Risk	Standardised Approach
Operational Risk	Basic Indicator Approach

Pillar II

Pillar II defines the process of supervisory review of an institution's risk management framework and, ultimately its capital adequacy.

Pillar II comprises two processes:

- An Internal Capital Adequacy Assessment Process ("ICAAP"), and
- A supervisory review and evaluation process.

The Bank has in place ICAAP procedures for computation of economic capital for all risks including those not covered under Pillar I. The Bank regularly monitors its internal capital adequacy ratio to ensure that there is adequate cover for all risks faced by the Bank.

15 RISK MANAGEMENT DISCLOSURES

2. INTRODUCTION TO BASEL III & RISK MANAGEMENT (CONTINUED)

Pillar III

Pillar III complements the other two pillars and focuses on enhanced transparency in disclosure of information by the Banks to promote better market discipline. The information to be disclosed covers all areas including business performance, capital adequacy, risk management, etc. The disclosures are designed to enable stakeholders and market participants to assess an institution's risk appetite and risk exposures and to encourage all banks, via market pressures, to move towards more advanced forms of risk management.

In April 2008, CBB published a paper covering the detailed disclosure requirements to be followed by licensed banks in Bahrain to be in compliance with Pillar III under the Basel II framework. This document is prepared in accordance with these directives.

2.1 The risk management function

The Board of Directors has overall responsibility for risk management in the Bank. The Board lays down the risk management policies of the Bank and quantifies its risk appetite through appropriate definitions of various risk limits and tolerances. The Board discharges its risk management responsibilities through the Board Audit & Risk Management Committee ("BARMC").

The Board has established an Executive Risk Management Committee ("ERMC"), which is responsible for developing and monitoring Bank risk management policies in the specified areas. The committee consists of heads of business and other functional units in the Bank and reports regularly to the BARMC. The committee meets on a monthly basis as per set agenda and its Terms of Reference covering all risk issues and policy matters.

The day to day risk management functions are performed by the Risk Management Department ("RMD") of the Bank. RMD is responsible to ensure that the policies laid down by the Board are consistently implemented across the Bank and to review the adequacy of these policies periodically. It monitors all risk taking activities and ensures that the risk limits defined by the Board are complied with. The department has specialized personnel dealing with Credit, Market, and Operational Risks. It is independent of all risk taking functions in the Bank and reports to the BARMC through the ERMC chaired by the CEO.

The Asset Liability Management Committee ("ALCO") of the Bank acting through the Treasury Department monitors the Bank's liquidity position and recommends appropriate action to the Board where necessary. There is a high level of coordination between the RMD, ERMC and ALCO.

The RMD prepares a risk overview report on a quarterly basis which covers in detail the various risks faced by the Bank and the same is discussed at the ERMC, BARMC and the Board on a quarterly basis.

The Bank considers that its overall risk management strategies have been effective throughout the reporting period.

All policies having significant impact on the overall internal control framework existing in the Bank are subject to periodic review and approval by the Board of Directors.

The RMD, together with the Internal Audit and Compliance Departments, provides independent assurance that all types of risk are being measured and managed in accordance with the policies and guidelines set by the Board of Directors.

3. CAPITAL MANAGEMENT & CAPITAL ADEQUACY RATIO

3.1 Capital management

The Bank's policy is to maintain a strong capital base to develop and retain investor, creditor and market confidence and to sustain business growth. The Bank recognises the impact of a high level of capital on shareholders' returns, while not losing sight of the security and market confidence afforded by a sound capital base. The Bank aims to maintain a minimum total capital adequacy ratio significantly in excess of that mandated by the CBB.

15 RISK MANAGEMENT DISCLOSURES

3. CAPITAL MANAGEMENT & CAPITAL ADEQUACY RATIO (CONTINUED)

3.2 Internal Capital Adequacy Assessment Process (“ICAAP”)

The Bank has an established ICAAP as per the requirements under Pillar II of Basel II. ICAAP prescribes procedures and measures designed to ensure appropriate identification, measurement, aggregation and monitoring of the Bank’s risks. It also defines an appropriate level of internal capital in relation to the Bank’s overall risk profile and business plan.

ICAAP framework at the Bank

3.2.1 Risk addressed by the ICAAP

<i>Risk Type</i>	<i>Metrics based on which internal capital is allocated</i>
Credit risk Market risk Investment risk Operational risk	Regulatory capital adequacy guidelines to be used as proxy for internal capital for Pillar I risks
Liquidity risk	Maximum cumulative maturity gap, Liquidity ratio, Financing to deposit ratio
Profit rate risk (banking book)	Revaluation / sensitivity of the re-pricing gaps
Credit concentration risk	Thresholds for counterparty, country, sector exposures
Fiduciary risk	Size of off balance sheet special purpose vehicles (RIA's) & Large Investment Products
Reputational risk	Credit quality, Operational risk, Reputation related loss
Other risks (strategic, Shari'a / regulatory compliance, business cycle)	Additional capital based on Pillar I risk weighted exposures

Total Capital	105,963
RISK WEIGHTED ASSETS	
Credit risk weight exposures	582,915
Market risk weight exposures	7,995
Operational risk weight exposures	62,158
Total risk weighted assets	653,067
Capital adequacy ratio (CET1 and T1)	15.11%
Capital adequacy ratio (Total capital)	16.23%

The above capital adequacy ratios are calculated by dividing the respective regulatory capital base by the total RWA's.

Risk weighted assets

Credit risk

For regulatory reporting purposes, the Bank calculates the capital requirements for credit risk based on the standardised approach. Under this approach, the on and off-balance sheet credit exposures are assigned risk weights based on the type of counterparty, type of the exposure, and source of funding (equity of investment account holders ("IAH") or own funds). Further for capital adequacy computations, 100% of the RWA's is reckoned for self-financed assets while only 30% is considered for assets funded through equity of IAH. The risk weights for types of counterparties and exposures are prescribed by CBB.

Market risk

The Bank uses the standardised approach to measure market risk. Market risk for the Bank is primarily on account of the foreign exchange exposures that are considered as specific risks. As per the CBB guidelines, capital for foreign exchange risk is computed at 8% of overall net open foreign currency positions of the Bank and this is multiplied by 12.5 to derive the market RWA's.

15 RISK MANAGEMENT DISCLOSURES

BD 000's

3. CAPITAL MANAGEMENT & CAPITAL ADEQUACY RATIO (CONTINUED)

3.7 Capital structure, minimum capital requirements and capital adequacy (Continued)

Operational risk

The Bank adopts the Basic Indicator Approach to evaluate operational risk charge in accordance with the CBB Capital Adequacy Module for Islamic Banks. According to this approach, the Bank's average gross income for the past three financial years is multiplied by a fixed coefficient alpha of 15% set by the CBB to arrive at the capital required and a multiple of 12.5 is used to arrive at the RWA's that are subject to capital charge.

Break-up of capital requirement in accordance with the Capital Adequacy Module of the CBB for the year ended 31 December 2018 is as follows:

Exposure classification	Exposure			Risk Weighted Assets *			Capital requirement @ 12.5%		
	Self-financed	IAH	Total	Self-financed	IAH	Total	Self-financed	IAH	Total

² Excludes credit risk mitigants of BD 2,531 thousand

³ Includes exposure of BD 20,705 thousand with zero risk weight

* For capital adequacy computations, 100% of the RWA's is reckoned for self-financed assets while only 30% is considered for assets funded through equity of IAH.

15 RISK MANAGEMENT DISCLOSURES

BD 000's

4 CREDIT RISK

4.1 Credit risk management

Credit Risk is the risk that counterparty fails to meet its obligations in accordance with agreed terms and conditions. The major sources of credit risk in the Bank are under the following classes of assets:

- Placements with financial institutions,
- Financing assets,
- Assets acquired for leasing (including lease rentals receivable), and
- Investments in Sukuk.

For the purpose of capital adequacy computation (as well as certain other tables below) the following have also been considered as a part of credit risk:

- Investments in quoted and unquoted equity,
- Investment in real estate, and
- Other assets (including property and equipment).

The Bank has the necessary internal processes for assessing, monitoring and controlling credit risk both at the individual credit and portfolio levels. Credit limits are approved after a thorough assessment which takes into account the financial strength of the counterparty, the technical feasibility and economic viability of the business being financed, the adequacy and quality of the cash flow available for repayment, etc. in addition to availability of collateral security by way of physical assets or guarantees. The RMD reviews every credit proposal and incorporates its remarks on the proposal before the same is considered by the appropriate authority as per delegated approval levels granted by the Bank's Board of Directors.

At the portfolio level, the Board has established risk concentration limits for single counterparties and related counterparties forming a business group, geographical and economic sectors as well as exposures to counterparties related to the Bank and/or its major shareholders. The RMD regularly monitors compliance with these limits and deviations if any are reported regularly to the Senior Management, Executive Risk Management Committees and the Board of Directors.

4.2 Levels of exposure

The table below shows gross credit exposure along with average credit exposure broken down under different exposure classes as at 31 December 2018:

Gross / Average Credit Exposures	Average Exposure ¹	Gross Exposure		
		Self-financed	IAH	Total
Cash and bank balances	71,141	23,129	76,321	99,450
Placement with financial institutions	36,389	-	43,637	43,637

15 RISK MANAGEMENT DISCLOSURES

4 CREDIT RISK (CONTINUED)

4.3 Concentration of credit risk (Continued)

4.3.2 Industry / sector-wise distribution

The Board of Directors has stipulated maximum exposures to various industry sectors. The industry/ sector wise exposure as at 31 December 2018 was as follows:

31 December 2018	Banks and financial institutions	Real estate	Others	Total
Assets				
Cash and bank balances	99,401	-	-	99,401
Placement with financial institutions	43,637	-	-	43,637
Financing assets *	10,358	51,630	265,652	327,640
Investment in sukuk	11,795	7,540	141,989	161,324
Assets acquired for leasing (including lease rentals receivable)	-	118,615	1,588	120,203
Investment in equity securities	13,418	33,223	3,668	50,039
Investment in real estate	-	18,081	-	18,801
Development property	-	6,251	-	6,251
Other assets	1,040	6,822	8,636	16,489
Property and equipment	-	6,739	1,126	7,865
Total funded exposure	179,379	248,901	422,659	850,939
Commitments and financial guarantees	513	12,913	32,631	46,057

* Financing asset exposures have been classified based on the purpose of financing.

4.3.3 Transactions with related counterparties

Related counterparties are those entities which are related to the Bank through significant shareholding, control, or both. Wherever the Bank has entered into business transactions with such counterparties, such transactions have been done at an arm's length basis and on commercial terms that bring no disadvantage to the Bank. For the purpose of identification of related counterparties, the Bank strictly follows the guidelines issued by CBB.

Detailed break up is presented in note 26 of the consolidated financial statements for the year ended 31 December 2018.

4.3.4 Exposures exceeding materiality thresholds

The Bank is required to carry out capital adjustments (deduction) for its exposure to significant investments in capital of banking and financial entities subject to certain materiality thresholds as defined in the Capital Adequacy Module ("CA Module") of the CBB Rule Book.

Further, the exposures in excess of limits prescribed by Credit Risk Management Module ("CM Module") (single obligor limit of 15% of total capital and aggregate limit for connected counterparty exposure of 25% of total capital) are subject to risk weight of 800%. For investment in a financial entity where ownership is < 10% of the issued common capital, 40% of the amount exceeding 10% of CET1 (a) is subject to deduction from CET1 (a). The following table summarises the exposures exceeding regulatory limits as of 31 December 2018:

15 RISK MANAGEMENT DISCLOSURES

4 CREDIT RISK (CONTINUED)

4.3 Concentration of credit risk (Continued)

4.3.4 Exposures exceeding materiality thresholds (Continued)

Counterparty	Exposure type	Total exposure	Total exposure as a % of eligible capital	Exposures risk weighted @ 800%
Connected counterparties	Investments, financing and other assets	19,758	18.65%	-
Investment in financial entities	Investment in financial entities <10%	13,148	12.41%	3,037

* In line with the transitional provisions of CA module 80% of the exposure exceeding materiality threshold (BD 2,430 thousand) has been considered for regulatory capital adjustment.

4.3.5 Exposures in highly leveraged counterparties

The following balances represent the financing facilities to highly leveraged or other high risk counterparties as of 31 December 2018:

Counterparties	Gross BD '000	Provision BD '000	Net BD '000
Counterparty # 1	9,351	482	8,869

4.3.6 Residual contractual maturity of the credit portfolio and investment in sukuk

The Bank's policy allows exposures up to a maximum period of 7 years for corporate customers and 25 years for retail customers with any exceptions to be approved by the Board of directors. The Bank constantly monitors the residual maturity profile of its assets to ensure that any mismatch with the maturity of its liabilities is kept within acceptable limits. The contractual residual maturity profile by type of financing contract of the Bank's credit portfolio and investment in sukuk is given in the table below:

Maturity Scale	< 1 M	1 - 3 M	3 - 6 M	6M - 1Y	1 - 3Y	3 - 5Y	5 - 10Y	10 - 20Y	Over 20Y	Total
Credit portfolio:

4.4 Equity risk in banking book

The Bank has certain equity investments classified in the banking book and are subject to credit risk weighting under the capital adequacy framework. For regulatory capital computation purposes, the Bank's equity investments in the banking book include unquoted equity investments, and investments in associates being non-financial entities.

Please refer to notes 5 of the consolidated financial statements for policies covering the accounting of equity holdings, including the accounting policies and valuation methodologies used, key assumptions and practices affecting valuation.

15 RISK MANAGEMENT DISCLOSURES

BD 000's

4 CREDIT RISK (CONTINUED)

4.4 Equity risk in banking book (Continued)

The RMD works alongside the Investment Department at all stages of the deal cycle, from pre-investment due diligence to exit, and provides an independent review of every transaction. An impairment assessment of investments takes place every quarter with inputs from the Investment department and RMD. Quarterly updates of investments are reviewed by the Board of Directors and are submitted to the CBB.

The Bank's equity investments are predominantly in its own products, which includes private equity and infrastructure development projects. The intent of such investments is a later stage exit along with the investors, by means of strategic sell outs at the project level or through initial public offerings. The Bank also has a strategic investment portfolio which is aligned with the long term investment objectives of the Bank.

Information on equity investments	Amount
Privately held	50,039
Dividend income	1,422

The following are the categories under which equity investments are included in the capital adequacy computations as per the requirements of the CBB rules:

Equity investments in banking book	Gross exposure		Risk weighted exposure		Capital charge @12.5%

BD 000's

4 CREDIT RISK (CONTINUED)

4.5 Risk grading of exposures

The Group adopts a well-structured internal Credit Risk Rating system as a mean of differentiating the degree of credit risk in the different credit exposures of the Group to allow more accurate determination of the overall characteristics of the asset portfolio, concentrations, limits management, problem assets, pricing, and the adequacy of loss reserves (provisions). As well as identifying the risks associated with a counterparty and a credit facility, CRRs provide a key input for the capital charges and risk weights. The Group's approach to credit risk rating is documented in the Credit Risk Rating Policy which aims at achieving the following: (a) create a benchmark for assessing relative creditworthiness of the graded entity and measure credit risk in relation to the market, (b) arrive at a system of risk-based pricing for credit facilities granted by the Group, (c) monitor the overall credit risk inherent in the Group's Credit portfolio, (d) create a benchmark for recognition of accrued income on credit assets, (e) link asset review frequency and approval authority levels to Credit risk and emphasize focus on effective management of weak assets, and (f) provide a means to link Internal Capital Adequacy to the portfolio credit risk.

The Group allocates each exposure to credit risk grade based on a variety of data that is determined to be predictive of the risk of default and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of borrower. The grading sheets are prepared by the Business Department and reviewed by the RMD. Grades are continuously monitored by the Bank's Credit Administration Unit within RMD and exposures are downgraded depending on the days past due, if any based on clear criteria laid out in the Bank's credit policy. Further, the grading for corporate customers is also subject to review at least on an annual basis. Movement of grades for credit exposures is reported quarterly to the Board.

Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates so, for example, the difference in risk of default between credit risk grades 1 and 2 is smaller than the difference between credit risk grades 2 and 3.

Each exposure is allocated to a credit risk grade at initial recognition based on available information about the borrower. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. Exposers are rated 1 to 10 with 1 to being good and 7 being watch list and 8, 9 and 10 default grades.

The Bank relies on credit/risk ratings for financial institutions, as they are generally rated by an ECAI, as per the following guidelines:

- The Bank will use ratings issued by ECAIs approved by the Central Bank of Bahrain ("CBB") only. These currently comprise S&P, Moody's, Fitch, Capital Intelligence ("C.I."), and Islamic International Rating Agency ("IIRA").
- Ratings will be used consistently for risk assessment purposes from selected ECAIs;
- The Bank will utilize the lowest rating, in case of multiple ECAIs rating for any financial institutions;
- The Bank will not use the issue specific risk rating of an un-rated financial institutions except in case of specific investment in that financing instrument or bank claim pari passu to the issuer;
- Domestic currency ratings will be used to assess claims in domestic currency while foreign currency rating would be used for foreign currency exposures;
- Short-term rating of the financial institutions cannot be used for risk assessments of un-rated long-term claims.

15 RISK MANAGEMENT DISCLOSURES

BD 000's

4 CREDIT RISK (CONTINUED)

4.5 Risk grading of exposures (Continued)

Different ECAs issue different coding-references to refer to the risk rating of the financial institutions. The following rating equalization table, provided by CBB, is to be used to map the ECAs ratings into the Bank's internal ratings:

S&P	Moody's	Fitch	C.I.	IIRA	Internal		
					Grade	Class	
AAA	Aaa	AAA	AAA	AAA	1	Prime	Investment Rated
AA+	Aa1	AA+	AA+	AA+	2	Excellent	
AA	Aa2	AA	AA	AA	2		
AA-	Aa3	AA-	AA-	AA-	2		
A+	A1	A+	A+	A+	3	Very Good	
A	A2	A	A	A	3		
A-	A3	A-	A-	A-	3		
BBB+	Baa1	BBB+	BBB+	BBB+	4	Good	
BBB	Baa2	BBB	BBB	BBB	4		
BBB-	Baa3	BBB-	BBB-	BBB-	4		
BB+	Ba1	BB+	BB+	BB+	5	Satisfactory	Non-Investment Rated
BB	Ba2	BB	BB	BB	5		
BB-	Ba3	BB-	BB-	BB-	5		
B+	B1	B+	B+	B+	6	Average	
B	B2	B	B	B	6		
B-	B3	B-	B-	B-	6		
CCC+	Caa1	CCC+	C+	CCC+	7	Watch List	
CCC	Caa2	CCC	C	CCC	7		
CCC-	Caa3	CCC-	C-	CCC-	7		
CC	Ca	CC	D	CC	8	Sub-standard	
C	C	C	-	C	9	Doubtful	
D	-	D	-	D	10	Loss	

Please refer to note 34 of the consolidated financial statements for the year ended 31 December 2018, for details of the grading profile of credit exposures of the Bank.

4.6 Past dues, impaired accounts, provisions

Customers may occasionally fail to meet their obligations to the Bank on due dates. Any amount not paid when due is classified as past due and the Bank initiates focused recovery efforts on such accounts.

The Group has adopted FAS 30 / IFRS 9 standards that classify exposures into three stages to measure ECL on exposures subject to credit risk. Exposures classified in stage 3 are considered Credit Impaired, this includes exposures with past due exceeding 90 days.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

15 RISK MANAGEMENT DISCLOSURES

BD 000's

4 CREDIT RISK (CONTINUED)

4.6 Past dues, impaired accounts, provisions (Continued)

The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security, if any is held; or
- the financial asset is more than 90 days past due

FAS 30 classifies assets and exposures into three categories based on the nature of risks involved (i.e. credit risk and other risks) and prescribes three approaches for assessing losses for each of these categories of assets 1) Credit Losses approach, 2) Net Realizable Value approach ("NRV") and 3) Impairment approach.

The Group recognises loss allowances for ECLs on:

- Cash and bank balances;
- Placements with financial institutions;
- Financing assets;
- Assets acquired for leasing (including lease rental receivable);
- Investments in Sukuk - debt-type securities at amortised cost; and
- Undrawn financing commitments and financial guarantee contracts issued.

The Group measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- Debt-type securities that are determined to have low credit risk at the reporting date; and
- other debt-type securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

The Group considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. The Group considers this to be BBB- or higher per S&P.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive). ECLs are discounted at the effective profit rate of the financial asset.

The Group makes provisions for impairment on individual assets classified under grades 8,9 and 10. This is done on the basis of the present value of projected future cash flows from the assets themselves and consideration of the value of the collateral securities available.

For a detailed policy on impairment of financial assets, please refer to note 5 (k) of the consolidated financial statements for the year ended 31 December 2018.

For the quantitative disclosures relating to exposures which were past due or impaired as of 31 December 2018, please refer to note 34 of the consolidated financial statement for the year ended 31 December 2018.

4.7 Renegotiated facilities

For disclosure of renegotiated facilities, please refer to note 34 of the consolidated financial statements for the year ended 31 December 2018.

4.8 Legal action and write-off of exposures

The Bank has policy for initiation and prosecution of legal action when all amicable avenues for settlement of dues from a customer have been exhausted. As of 31 December 2018, the Bank was involved in 212 litigations for recovery of dues from clients amounting to BD 18.7 Million in addition, there were claims by 6 of the clients against the Bank amounting to BD 194 Thousands in relation to restricted investment accounts and customer accounts.

The Bank has a policy that permits write-off of exposures when there is no possibility of recovery of the dues through legal and other means.

4.9 Penalties for delayed payments

In cases where customers delay the payment of dues to the Bank, the Bank has the right to collect penalties, subject to the provisions of the agreement between the customer and the Bank. The Bank recovers such penalties from customers when the amounts are significant. As per policy, such penalties are maintained in a separate account and used for charity purposes approved by the Bank's Shari'a Board.

15 RISK MANAGEMENT DISCLOSURES

BD 000's

4 CREDIT RISK (CONTINUED)

4.9 Penalties for delayed payments (Continued)

The Bank has a policy of creating a contribution for Charity and Zakah fund for any non-Islamic income earned. During the year ended 31 December 2018, an amount of BD 15 thousand was thus transferred to Charity and Zakah fund.

For quantitative disclosures, please refer to consolidated statement of sources and uses of charity and Zakah fund in the consolidated financial statements for the year ended 31 December 2018.

4.10 Credit risk mitigation

The Bank uses a variety of tools to mitigate its credit risk, the primary one being that of securing the exposure by suitable collateral security. While existence of collateral security is not a policy precondition for financing, in practice a large part of existing exposures are at least partially supported by collateralised security. The Bank has clear policies on the type of assets that can be accepted as collateral security and the mode of valuation of these assets. In general, all assets accepted as collateral are valued at least once in a year. The legal validity and enforceability of the documents used for creating these collaterals have been established by external legal experts.

The position of collateral cover for all credit exposures categorised on the basis of the type of security as on 31 December 2018 is given in the table below:

Collateral Type	Murabaha	Musharaka	Mudharaba	Wakala	Istisna	Ijara	Value of collateral ¹	Gross Exposure ²	% of cover	% of Total
Real estate	215,731	14,205	195	3,016	1,012	171,954	406,114	285,952	142%	94%
Listed securities	-	-	-	-	-	-	-	-	0%	0%
Unlisted securities	-	-	-	-	-	-	-	-	0%	0%
Bank guarantee	-	-	-	-	-	-	-	-	0%	0%
Cash collateral	17,890	-	-	-	-	448	18,338	36,679	50%	4%
Others	7,724	-	-	-	-	-	7,724	24,927	31%	2%
Unsecured	-	-	-	-	-	-	-	124,763	0%	0%
Total	241,345	14,205	195	3,016	1,012	172,402	432,175	472,322		

¹ Represents collateral values based on the last valuation carried out based on the Bank's valuation policy including collaterals which exceed the book value of facility.

² The amounts are gross of ECL of BD 24,479 thousand.

Real estate properties are reckoned at values certified by qualified valuers. Other physical assets like machinery are valued at book value, invoice value or as certified by an outside expert. Listed securities are valued at market price while un-listed ones are carried at cost less impairment. The Bank has an approved panel of valuers for real estate property. Valuation exercise is supervised by RMD, independent of the business units.

Facilities are also often secured by personal/ corporate guarantees, joint ownership of vehicles, assignment of contract proceeds, assignment of insurance policies, etc. However under the Bank's credit policy these are not treated as tangible securities and the value of such guarantees/ assignments, though significant in many cases, are taken as nil for the purpose of the above analysis.

Assets financed under Ijara Muntahia Bittamleek are considered at par with physical collateral and included under Real Estate or Others in the above calculations.

15 RISK MANAGEMENT DISCLOSURES

4 CREDIT RISK (CONTINUED)

4.10 Credit risk mitigation (Continued)

The declared value of exposures in all cases is the gross exposure before any provisions. The Bank does not carry out any on or off balance sheet netting for the securities held. The Bank has not claimed any capital relief for Credit Risk Mitigation under Section CA 4.7 of the Capital Adequacy Module of CBB rule book and hence all exposures are risk weighted at their gross values for the purpose of computation of capital adequacy ratio.

The Bank has a policy of disposal of asset held as collateral not readily convertible into cash, after completion of necessary legal formalities.

4.11 Regulatory capital requirements by type of financing contracts

Financing contract	Exposure		Credit Risk Weighted Assets		Capital Requirement @ 12.5%	
	Self-financed	IAH	Self-financed	IAH	Self-financed	IAH
Murabaha	263,941	62,441	275,669	17,973	34,459	2,247
Ijara assets (including lease rentals receivable)	120,203	-	-	-	-	-
Musharaka	3,541	-	3,541	-	443	-
Mudharaba	1,049	-	1,049	-	131	-
Wakala	4,411	596	4,411	179	551	22
Istisna	-	2,054	-	616	-	77
Total	393,145	65,091	284,670	18,768	35,584	2,346

5 MARKET RISK

5.1 Market risk management

Market risk is the risk that changes in market prices, such as foreign exchange rates, profit rates, equity prices, and commodity prices will affect the Bank's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

CBB rules require that the Bank separates its exposure to market risk between trading and non-trading portfolios. The Bank has no trading positions in equity or commodities and the main source of market risk for the Bank is its foreign exchange exposure and sukuk exposure, although this is quite limited. There is also an extent of profit rate risk arising out of mismatches in its asset liability structure. The Bank has well-defined policies approved by the Board with clear risk limits and thresholds to effectively manage its market risk.

In 2012, the Bank had commenced trading in Sukuks on a very selective basis. To begin with trading will be restricted to listed and traded sukuks issued by sovereign/ quasi sovereign entities or by other GCC issuers with an investment grade rating from Moody's or S&P. The size of the trading book at the end of the year was Nil.

The sukuk risk is monitored by marking to market of the portfolio on a daily basis. The size of the portfolio and more importantly the number of instruments is too small for any statistical model to be reliable.

The Bank has formulated a comprehensive Sukuk Trading and Sukuk Fund Participation policy duly approved by the Board of Directors. The primary objective being trading in Sukuks and participation in Sukuk funds and or other fixed income Shari'a compliant structured products as a part of Treasury Business. The policy sets clear guidelines for Sukuk Trading and participation in Sukuk funds, limits, Target market, sectors, country, tenor, Stop loss triggers and actions and reporting. The portfolio is monitored on a mark to mark basis and reported to the ALCO.

15 RISK MANAGEMENT DISCLOSURES

BD 000's

5 MARKET RISK (CONTINUED)

5.1 Market risk management (Continued)

The ALCO committee reviews these investments as part of the overall monitoring of cash management and treasury and investment activities of the Bank.

Details on market risk management, net exposures and sensitivities are given as part of note 34 of the consolidated financial statements for the year ended 31 December 2018.

5.2 Regulatory capital allocation against market rate risk

The table below shows the market risk position for each category of the market risk as at 31 December 2018 along with the maximum and minimum values during the period:

	<i>As at 31 December</i>	<i>Max</i>	<i>Min</i>
Equity position risk	-	-	-
Market risk on trading positions in sukuk *	-	-	-
Foreign exchange risk	640	2,659	640
Commodity risk	-	-	-
Total (A)	640	2,659	640
Risk Weighted Assets (A x 12.5)	7,995	33,238	7,995
Capital requirement @ 12.5%	999	4,155	999

* Represents 30% of the exposure since these sukuk investments are allocated from IAH pool.

6 OPERATIONAL RISK

6.1 Operational risk management

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people, systems, and/ or from external events which includes but is not limited to, legal risk and Shari'a compliance risk. Operational risk is an inherent part of normal business operations. Whilst operational risk cannot be eliminated entirely, the Bank endeavors to minimise it by ensuring that a strong control infrastructure is in place throughout the organisation. Various procedures and processes used to manage operational risk including effective staff training, appropriate controls to safeguard assets and records, regular reconciliation of accounts and transactions, close monitoring of risk limits, segregation of duties, and financial management and reporting.

Details on operational risk management are given as part of note 34 of the consolidated financial statements for the year ended 31 December 2018.

RMD monitors all operational processes to ensure that the Board directives are fully implemented and deviations are reported if any to the Senior Management and to the Board. The department has specialised personnel engaged in this process. The Bank has implemented an Operational Risk Management System which monitors Key Risk Indicators and controls across all major areas of operation and generates appropriate triggers as and when pre-defined risk events occur (through breach of triggers set) and also generates periodical update report to the Board and to the Management. In addition, the Bank's policy dictates that the operational functions of booking, recording and monitoring of transactions are carried out by staff that are independent of the individuals initiating the transactions.

The Bank's operational risk management framework includes components such as Key Risk Indicators ("KRI's"), operational loss data and Risk & Control Self-Assessment across the Bank. These are monitored periodically which helps in quickly detecting and correcting deficiencies in processes and procedures. The collected data is maintained to create a loss database which could be the starting point for a more advanced operational risk measurement approach in future.

15 RISK MANAGEMENT DISCLOSURES

BD 000's

6 OPERATIONAL RISK (CONTINUED)

6.2 Litigation

As of the reporting date, the Bank has no material legal contingencies including pending legal actions except as reported in Para 4.8 above. The Bank has a dedicated legal team which provides legal advice and services to all business units of the Bank.

6.3 Shari'a compliance

The Shari'a Supervisory Board ("SSB") is entrusted with the duty of directing, reviewing and supervising the activities of the Bank in order to ensure that they are in compliance with the rules and principles of Islamic Shari'a. The Bank also has a dedicated internal Shari'a reviewer, who performs an ongoing review of the compliance with the fatwas and rulings of the SSB on products and processes and also reviews compliance with the requirements of the Shari'a standards prescribed by AAOIFI. The SSB reviews and approves all products and services before launching and offering to the customers and also conducts periodic reviews of the transactions of the Bank. An annual audit report is issued by the SSB confirming the Bank's compliance with Shari'a rules and principles.

6.4 Regulatory capital allocation against operational risk

The Bank uses the Basic Indicator Approach in calculating its regulatory capital requirement for operational risk.

The risk weighted assets and capital requirement for operational risk as at 31 December 2018 is as given below:

Average gross income for 3 years (A)	33,151
Operational Risk Weighted Assets (B) = A x 15% x 12.5	62,158
Capital requirement = B x 12.5%	7,770

7 OTHER RISKS

7.1 Liquidity risk

Liquidity risk is the risk that the Bank will encounter difficulty in meeting its financial obligations on account of a maturity mismatch between assets and liabilities. The Bank's approach to manage liquidity is to ensure that it will always have sufficient funds to meet its liabilities when due without incurring unacceptable losses or risking damage to the Bank's reputation.

The Bank has a liquidity risk policy in place, which describes the roles and responsibilities of the Asset Liability Management Committee ("ALCO"), Treasury and other concerned departments in management of liquidity. It also stipulates various liquidity ratios to be maintained by the bank, as well as gap limits under each time bucket of the maturity ladder. It is the Bank's policy to keep adequate level of high quality liquid assets such as inter-bank placements and sukuk to ensure that funds are available to meet maturing Mudharaba deposits, current accounts and other liabilities, as and when they fall due. The day to day management of liquidity risk is the responsibility of the Treasury Department, which monitors the sources and maturities of assets and liabilities closely, and ensures that limits stipulated by the ALCO are complied with. RMD and Financial Control Department ("FCD") monitors the liquidity position and any violations are reported to ALCO, ERM and the Board of Directors.

For maturity profile of assets and liabilities, please refer to note 31 of the consolidated financial statements for the year ended 31 December 2018.

15 RISK MANAGEMENT DISCLOSURES

BD 000's

7 OTHER RISKS (CONTINUED)

7.1 Liquidity risk (Continued)

The following are the key liquidity ratios which reflect the liquidity position of the Bank:

	<i>Figures in %</i>				
	2018	2017	2016	2015	2014
Interbank assets to interbank liabilities	62.61%	47.02%	162.20%	115.60%	176.87%
Liquid assets to total assets	30.02%	22.19%	27.30%	22.75%	25.23%
Liquid assets to total deposits	47.55%	35.12%	35.94%	30.65%	34.69%
Net liquid assets to total deposits	18.08%	10.07%	25.78%	20.96%	23.03%

7.2 Profit rate risk in the banking book

The other principal risk to which the banking book is exposed, is the risk of loss from fluctuations in the future cash flows or fair values of financial instrument because of a change in market profit rates. Profit rate risk is managed principally through monitoring profit rate gaps and by having pre-approved limits for re-pricing bands. The ALCO is the monitoring body for compliance with these limits and is assisted by the RMD in its day-to-day monitoring activities.

The management of profit rate risk against profit rate gap limits is supplemented by monitoring the sensitivity of the Bank's financial assets and liabilities to various standard and non-standard profit rate scenarios. Standard scenarios that are considered on a monthly basis include a 200 basis points (bps) parallel fall or rise across all yield curves. An analysis of the Bank's sensitivity to an increase or decrease in market profit rates (assuming no asymmetrical movement in yield curves and a constant statement of financial position) is as follows:

	200bp parallel increase / decrease
At 31 December 2018	±298
At 31 December 2017	±391

7.3 Counterparty credit risk

Counterparty credit risk is the risk that a counterparty to a contract in the profit rate, foreign exchange, equity and credit markets defaults prior to maturity of the contract. The Bank does not engage in proprietary trading of equity, foreign exchange or its derivatives. However, the Bank enters into Shari'a compliant foreign exchange risk/ profit rate risk transactions to hedge its risks arising out of mismatch in its asset liability portfolios. Clear policies for such transactions are in place. For other credit market transactions (primarily interbank placements), the Bank has established a matrix of counterparty limits based on external credit rating of such counterparties. Such limits are constantly monitored by the RMD. As at 31 December 2018, the Bank did not have any open position in foreign currency risk management instruments.

7.4 Concentration risk

Concentration risks arises when a number of obligors, counterparties or investees are engaged in similar business activities or activities in the same geographic region or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Accordingly, such concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or region. To manage this risk, the Bank has established exposure limits to various geographic regions and industry sectors. Such limits are monitored by the RMD and deviations, if any, are reported to the Board on quarterly basis. As at 31 December 2018, there has been no violation of the Board approved limits under any head. For break-up of exposure geography and industry/ sector wise, please refer to notes 4.3.1 and 4.3.2 above.

15 RISK MANAGEMENT DISCLOSURES

7 OTHER RISKS (CONTINUED)

7.5 Reputational risk

Reputation risk is the risk that negative perception regarding the Bank's business practices or internal controls, whether true or not, will cause a decline in the Bank's investor base that could have an adverse impact on liquidity or capital of the Bank. This may also lead to litigation against the bank which apart from avoidable legal expenses will also damage Bank's credibility which in turn will adversely affect business growth and profitability. Being an Islamic Bank, reputation is an important asset and one of the issues that could affect the Bank's reputation is the inability to exit from investments, lower than expected returns on investments, growth of non-performing asset portfolio and poor communication to investors. The Bank has a well-developed and coherently implemented communication strategy to cover such contingencies. The Bank also allocates additional capital for such risks under its ICAAP.

7.6 Displaced commercial risk

Displaced commercial risk refers to the market pressure to pay returns that exceeds the rate that has been earned on the assets financed by equity of investment account holders. This can be due to the return on such assets being lower than that of competitors. The Bank has adequate policies and procedures in place to identify, monitor and address all potential risks that may arise from such activities. Please refer to the section on IAH for further details.

7.7 Other risks

Other risks include strategic risk, fiduciary risks, and regulatory risks, etc. which are inherent in all business and are not easily measurable or quantifiable. The Bank's Board has overall responsibility for approving and reviewing the risk strategies and amendments to the risk policies. The Bank senior management is responsible for implementing the risk strategy approved by the Board. The management also ensures that internal systems of corporate governance and regulatory compliance for management of fiduciary and reputational risks are robust and effective. The Bank also allocates additional capital for such risks under its ICAAP.

8 PRODUCT DISCLOSURES

8.1 Product descriptions & consumer awareness

The Bank has a disclosure policy which applies to all modes of communication to the public including written, oral and electronic communications. These disclosures are made on a timely basis in a manner required by applicable local and regulatory requirements.

The Bank offers a comprehensive mix of Shari'a compliant commercial and investment banking products. This include, apart from traditional financing products, a range of innovative structured investment products like funds, repackaged investments and restricted Mudharaba's. The Investment Department of the Bank has expertise in creating innovative high-end and value added products offering a wide range of structures, expected returns, tenors and risk profiles.

Proposal for any new product is initiated by individual business lines within the Bank. The Executive Risk Management Committee ("ERMC") of the Bank reviews such proposal to ensure that the new product/ business are in line with the Bank's business and risk strategy. All new products will need the approval of the Board of Directors and the Shari'a Supervisory Board of the Bank.

Information on new products or any change in existing products will be placed on the Bank's website www.khcbonline.com and/or published in the media. Product details are also shared with customers and the general public through brochures and/or, advertisements.

8.2 Complaint handling

The Bank takes disputes and complaints from all customers very seriously. These have the potential for a breakdown in relationships and can adversely affect the Bank's reputation. Left unattended these can also lead to litigation and possible censure by the regulatory authorities. The Bank has a comprehensive policy on handling of external complaints, approved by the Board. All employees of the Bank are aware of and abide by this policy.

15 RISK MANAGEMENT DISCLOSURES

8 PRODUCT DISCLOSURES (CONTINUED)

8.2 Complaint handling (Continued)

The Bank has designated an officer for handling of all external complaints and his contact details are displayed on the website and also at the Branch and in all printed publicity materials. Complaints are normally investigated by persons not directly related to the subject matter of the complaint. The Bank endeavors to address all complaints within five working days. Wherever this is not possible, the customer is contacted directly and a time frame for rectification of his complaint is advised. A periodical report on status of complaints is also submitted to the Board.

8.3 Equity of investment account holders (IAH's)

The Bank accepts funds in the form of Mudharaba from small investors and high net worth individuals. Equity of investment account holders ("IAH") represents funds offered by customers to the Bank to be invested in a Shari'a compliant manner, at the Bank's discretion as Mudharib. All IAH accounts are on profit sharing basis, but the Bank does not guarantee any particular level of return. Any loss arising from the investment will be borne by the customer except in the case of the Bank's negligence. The Bank charges a Mudharib fee as its share of profit.

The Bank accepts IAH funds in Bahraini Dinar, US Dollar and other international and GCC currencies for maturity periods ranging from 1 month to 36 months. The Bank completes its full range of KYC due diligence prior to accepting any investment. The customer also signs a written agreement covering all terms and conditions of the investment including tenor, basis of profit allocation, early withdrawal, etc.

Since 2009, the Bank offers a savings account product called "Al-Waffer" which entitles the investors to certain prizes in cash and in kind, decided based on a raffle draws held on monthly, quarterly and annual basis apart from the normal share of profits declared and distributed after reducing the Mudharib fees.

IAH is a significant funding source for the Bank and the returns offered to investors are in line with the market. However, any shortfall in yield on the investments made out of these funds exposes the Bank to displaced commercial risk. The Bank regularly monitors rate of return offered by competitors to evaluate the expectations of its IAH's. Bank's policy also provides for whole or partial waiver of the Mudharib share of income from investments due to it, to provide a reasonable return to its investors.

The Bank comingles its own funds and IAH funds and these are invested together. The Bank has identified two pools of assets where the IAH funds are invested and the income from which is allocated to such accounts. One pool is short term in nature to meet IAH short term investment requirements. The other pool is long term in nature to meet their long term investment requirements. Out of the gross income the investor's share is computed after deducting the Mudharib share. The profit allocation schedule signed by the customer prior to investment contains the scheme of allocation of the Mudharib share. Administrative expenses incurred for management of the funds are borne directly by the Bank and are not charged separately to investment accounts. Equity of IAH's are carried at their book value.

Subject to the provisions thereof, deposits held with the Bank are covered by the Deposit Protection Scheme established by the CBB regulation concerning the establishment of a Deposit Protection Scheme and a Deposit Protection Board.

The details of income distribution to (IAH) for the last five years are given below:

	2018	2017	2016	2015	2014

15 RISK MANAGEMENT DISCLOSURES

8 PRODUCT DISCLOSURES (CONTINUED)

8.4 Restricted Investment Accounts (RIA's)

The Bank offers Restricted Investment Accounts ("RIA's") to both small investors and high net worth individuals in the GCC. The Bank structures its RIA products to offer its customers an opportunity to choose from a wide range of returns, maturity periods, sectors, asset classes and risk levels. No RIA product was introduced/ marketed by the Bank in 2018.

All RIA offering documents ("Offering Document") are drafted and issued with input from the Bank's Investment Banking, Shari'a, Financial Control, Legal and Risk Management Departments to ensure that the Investors have sufficient information to make an informed decision after considering all relevant risk factors.

The Board of Directors is responsible for providing clear guidelines for the development, management and risk mitigation of its RIA investments and to ensure that there exist sound management and internal control systems to ensure that the interests of the IAH's are protected at all times. Wherever it is necessary for the Bank to establish Special Purpose Vehicles ("SPV's") for management of the investment, the Board ensures that the management of such SPV's is conducted in a professional and transparent manner by a duly appointed Board.

The Bank is aware of its fiduciary responsibilities in management of the RIA investments and has clear policies on discharge of these responsibilities. The Bank's Policy regarding its fiduciary responsibilities to the RIA investors and their funds, includes the following:

- Ensuring that the investment structure, Offering Documents and the investment itself are fully compliant with Islamic Shari'a principles and the CBB regulations;
- Appropriately advising investors, as part of the RIA Offering Document, of all the relevant and known risk factors and making it clear that the investment risk is to be borne by the investor before accepting the investment funds;
- Completing all necessary legal and financial due diligence on investments undertaken on behalf of the investors with the same level of rigor as the Bank requires for its own investments;
- Ensuring that the funds are invested strictly in accordance with the provisions outlined in the Offering Documents;
- Putting in place suitable resources and systems to manage and administer the investment and any necessary RIA SPV(s) and to proactively manage all risks;
- Preparing and disseminating periodical investment updates to investors on a regular basis during the tenor of the investment;
- Distributing the capital and profits to the investor in a just and equitable manner as Mudarib; and
- In all matters related to the RIA, RIA SPV(s) and the investment, act with the same level of care, good faith and diligence as the Bank would apply in managing its own investments.

Within the Bank, the above mentioned responsibilities and functions are provided, managed and monitored by qualified and experienced professionals from the Investment Banking, Shari'a, Financial Control, Legal, Investment Administration and the Risk Management Departments.

Investment update reports are prepared and disseminated by the Bank to the RIA Investors on a periodic (at least on a half yearly) basis outlining any material contracts/decisions, investment performance, distribution (if any) or exit criteria/information.

15 RISK MANAGEMENT DISCLOSURES

9 CORPORATE GOVERNANCE & OTHER DISCLOSURES

9.1 Corporate governance structure

The Bank is governed by the Bahrain Commercial Companies Law No. 21 of 2001 and its amendments (the "Companies Law"), the Kingdom of Bahrain Corporate Governance Code (the "CGC"), volume 2 and volume 6 of the Rulebook of the CBB (and in particular the High-Level Controls ("HC Module")), and the Bahrain Stock Exchange Law of 1987 (collectively, the "Regulations").

The Bank acknowledges its responsibility to all of its stakeholders and is committed to the highest standards of corporate governance. The Bank believes good corporate governance enhances stakeholder value and provides an appropriate guidance to the Board, its committees, and the Bank's Executive Management to carry out their duties in the best interest of the Bank and its stakeholders. The Bank maintains the highest levels of transparency, accountability and good management through the adoption and monitoring of corporate strategies, goals and policies to comply with its regulatory and ethical responsibilities.

9.2 Code of conduct

The Board has approved a code of conduct for all staff of the Bank and the Board members. The Code includes the process of dealing with conflict of interests. It also binds the Directors, Executive Management and staff to the highest standard of professionalism and diligence on discharging their duties. All Board members and senior management of the Bank have affirmed compliance with the Code of Conduct. A declaration is made by the Board members prior to each Board meeting confirming that they have disclosed all external appointments and notified the Chairman if there have been any changes to their external appointments since the previous meeting. Board members are excluded from dealings in matters related to an external entity where they hold an appointment at that entity.

9.3 Compliance with regulations

The Bank ensures compliance with the regulations applicable to an Islamic licensed bank at all times. It would report any non-compliance with the guidelines should there be any. The Bank's obligations to comply with the Regulations have been addressed through following a Corporate Governance Handbook in accordance with the corporate governance ("CG") and the High-Level Controls Module of the CBB Rulebook. The CG Handbook was developed to manage the Board and committees Charter, Management Committee Charters, Board and Management Code of Conduct, Conflict of Interest Policy, Whistle Blowing Policy, Corporate Governance Guidelines, Social Responsibility, Directors' Appointment Agreement, Board and Directors' Evaluation, and a Key Persons' Dealing Policy.

The Bank is committed to continuously review and develop its corporate governance policies to ensure compliance with the changing requirements of the Regulations and to ensure compliance with the international corporate governance best practice. The Bank, through its Board and Board Committees, endeavors to deliver the highest standards of governance for the benefit of its stakeholders.

9.4 Board of directors

As at 31 December 2018, the Board of the Bank comprise ten members. Members of the Board were elected/ appointed for a three year renewable term during the Annual General Meeting ("AGM") meeting held on March 2017. The current composition of the Board complies with the requirements of the Regulations, except one requirements stated in paragraph 9.15 below.

- On 3rd April 2018, Mr. Jassim Mohammed Al Seddiqi and Mr. Mustafa Ghazi Kheriba were appointed as Non-independent and Executive members representing GFH Financial Group B.S.C., to complete the unexpired term of Dr. Ahmed Khalil Al Mutawa and Mr. Loay Hassan Ahmadi.
- On 3rd April 2018, and in the light of the resignation of the former Chairman Dr. Ahmed Khalil Al Mutawa, the Board unanimously decided to recommend Mr. Jassim Mohammed Al Seddiqi as Chairman of the Board of Directors.
- On 11th July 2018, and in the light of the resignation of the former Vice Chairman Mr. Abdulkarim Bucheeri, the Board unanimously decided to recommend Sh. Ahmed Bin Isa Al Khalifa as a Vice Chairman of the Board of Directors.
- On 10th October 2018, and in light of the resignation of the Board Member, Mr. Abdulkarim Ahmed Bucheeri, the Board decided based on a recommendation of two members of the Board to appoint Mr. Riyadh Eid Al Yaqoob, pursuant to Article 179 of the Bahrain Commercial Companies Law.

15 RISK MANAGEMENT DISCLOSURES

9 CORPORATE GOVERNANCE & OTHER DISCLOSURES (CONTINUED)

9.4 Board of directors (Continued)

The Board Nominations, Remunerations and Governance Committee ("BNRGC") reviews the skills and qualifications required of directors on periodic basis for potential nominee director. A nominee director may be elected by the shareholders upon receiving majority of votes during the election process. Positions at the Board are filled in compliance with the Bank's Articles of Association and the Commercial Companies Law. A Director's membership to the Board shall terminate in the cases provided for by the Companies Law and the Articles of Association of the Bank.

The Chairman of the Board of Directors is charged with regular supervision and assessment of executive management and is responsible for leading the Board, ensuring its effectiveness, monitoring the performance of the CEO and maintaining a dialogue with the Bank's stakeholders. The Board has constituted certain committees with specific delegated authorities to oversee and guide the management in specific areas of the Bank's operations and decision-making. The Board, either directly or through its various committees, will oversee the management of the Bank.

The Board has formalized the division of work responsibilities between the Board and the Bank's management. Working in consultation with the Bank's management team, the Board provides oversight for the overall management of the Bank's business. The Board reviews and approves the corporate strategy for the Bank and has overall responsibility for risk management, financial reporting and corporate governance issues. Matters that specifically require Board approval include, amongst other things, the financial statements and the acquisition and disposal of companies. The Board also ensures that the Bank upholds the Bank's core values including the values set out in the Bank's internal policies.

The Board Audit and Risk Management Committee ("BARMC") in addition to the functions of control, ensures that all policies prescribed are reviewed and updated on annual basis. The Risk management department in conjunction with the Internal Audit and Control unit ensures the policies and procedures are updated and adhered to under the oversight of the related management committees. The Board is also responsible for approving any related party transaction as per the Bank's authority matrix. Related party transactions concerning a Board member should be minimally approved by the Board Investment and Credit Committee ("BICC"). In addition, any material transaction defined by the Bank (10% of the Banks' capital) should be approved by the Board. The preparation of the consolidated financial statements of the Bank and the Group's undertaking to operate in accordance with Islamic Sharia rules and principles is the responsibility of the Board of Directors. The duties, functions, and responsibilities are detailed in the Bank's Corporate Governance Framework.

Members of the Board have access to the Bank's management at all times. The CEO together with the Bank's senior management monitors the Bank's performance against pre-set corporate objectives and manages the Bank's day-to-day affairs based upon the policies, objectives, strategies and guidelines lay down and approved by the Board from time to time.

The Board of Directors of the Bank comprises of Executive and Non-Executive Directors. The Board has five independent members (out of a total of ten Directors).

Upon appointment, each Director is provided with a comprehensive, formal and tailored induction which includes, amongst other things, a review of the Board's role and duties and the relevant Director's roles and duties to the Bank; meetings with the bank's senior management; visits to the Bank's branches and other sites; presentations to explain the Bank's strategic plans and significant financial, accounting, risk and legal issues and compliance programs; and meetings with internal and external auditors and legal counsel. In accordance with paragraph 1.9.1 of the HC module of CBB Rulebook, the Board and its committees are also individually evaluated and assessed for their performance effectiveness. The Board has conducted an evaluation of its performance and the performance of each committee and each individual director during the year 2018.

The Chairman, board members and board committees have direct contact with the heads of the Internal Audit, Risk Management, Compliance and Shari'a Compliance departments. In this regard, the Board of Directors and its committees receive from the executive management and internal audit, risk management, financial control, compliance, Shari'a internal audit departments periodic reports on various aspects of the Bank's business.

Each independent Director of the Bank is a professional in their field and possesses a background in the financial and banking field.

9.13 Organizational chart

Set out below is the Bank’s organization chart, which outlines the different committees and the lines of reporting.

9.14 Executive compensation

The Bank has both a short-term and long-term compensation structure for its executive management which has been developed based on current market surveys and industry norms. The Bank also had an incentive scheme where in eligible employees were awarded a combination of shares and cash incentives on achievement of pre-determined performance targets. For further details please refer note 26 of the consolidated financial statements for the year ended 31 December 2018. The Board of Directors is entitled to sitting fees and their annual remuneration is subject to the approval of the shareholders at the end of each year.

15 RISK MANAGEMENT DISCLOSURES

9 CORPORATE GOVERNANCE & OTHER DISCLOSURES (CONTINUED)

9.15 Shari'a compliance, regulatory compliance and anti-money laundering

Compliance with Shari'a laws, regulatory and statutory requirements is an ongoing process and the Bank is conscious of its responsibilities in observing all applicable provisions and best international practices in its functioning. The Bank has established the Shari'a Compliance Function and the Regulatory Compliance Function in keeping with Basel and CBB guidelines. The respective units act as a focal point for all Shari'a and regulatory compliance and for adapting other best practice compliance principles.

Anti-Money Laundering measures form an important area of the Compliance Function. The Bank has an Anti-Money Laundering and Combating Terrorist Financing Policy and Procedure approved by the Board, which contains sound Customer due diligence measures, procedure for identifying and reporting suspicious transactions, a program for periodic awareness training to staff, record-keeping, and a designated Money Laundering Reporting Officer (MLRO). The Bank's Anti-Money Laundering measures are reviewed by independent external auditors every year and their report is submitted to the CBB. The Bank is committed to combating money laundering and is in compliance with the guidelines issued by the CBB in relation to Anti-Money Laundering requirements.

The Bank is in compliance with the requirements of the HC Module of the CBB Rulebook, except for the following:

- HC 1.4.6: that requires the chairman of the Board to be an independent director.

9.16 Audit fees charged by the external auditor and other non-audit services provided by the external auditor and fees paid

The audit fees charged and non-audit services provided by external auditors will be made available to the shareholders as and when requested. Such details will be made available to the Bank's shareholders as per their specific request provided that these disclosures would not negatively impact the Bank's interest and its competition in the market.

9.17 Penalties paid to the Central Bank of Bahrain

During 2018, no penalty was charged to the Bank.

9.18 Related party Transactions

For detailed discussion on the related party transactions, kindly refer to notes (no. 26) on the consolidated financial statement for the year ended 31 December 2018.

9.19 Board approved policy on the employment of relatives of approved persons:

The Bank does not permit the employment of immediate relatives of current employees. Employment of other relatives is permitted. However, employees who are relatives shall not be placed within the same department or same direct line of supervision. In case of marriage, the Bank reserves the right to terminate the employment of one of the spouses. The HR will disclose to the board of directors on an annual basis relatives of any approved persons occupying controlled functions within the Bank up to the 4th degree of kinship.

15 RISK MANAGEMENT DISCLOSURES

10 FINANCIAL PERFORMANCE

Following are basic quantitative indicators of the financial performance:

	2018	2017	2016	2015	2014
Return on average equity	0.56%	0.71%	4.77%	7.48%	3.00%
Return on average assets	0.08%	0.11%	0.77%	1.27%	0.53%
Finance income to finance expense	146.03%	221.37%	264.91%	231.02%	197.05%
Cost-to-income *	64.34%	60.80%	44.82%	53.64%	75.80%

* Cost excludes impairment allowances.

For detailed discussion on the performance for the year, kindly refer to Chairman's report on the consolidated financial statement for the year ended 31 December 2018.

11 REMUNERATION RELATED DISCLOSURES

The Banks total compensation policy, which includes the variable remuneration policy, sets out the Banks's policy on remuneration for directors and senior management and the key factors that were taken into account in setting the policy.

In 2014, the Bank has adopted the Sound Remuneration Practices issued by the Central Bank of Bahrain and has proposed revisions to its variable remuneration framework. The revised policy framework and incentive components were approved by the shareholders in the annual general meeting held on March 2015. The policy is effective starting 2014 annual performance incentives and would be fully implemented for future periods.

The key features of the remuneration framework have been summarized below.

11.1 Remuneration strategy

It is the Bank's basic compensation philosophy to provide a competitive level of total compensation to attract and retain qualified and competent employees. The Bank's variable remuneration policy will be driven primarily by a performance based culture that aligns employee interests with those of the shareholders of the Bank. These elements support the achievement of our objectives through balancing reward for both short-term results and long-term sustainable performance. Our strategy is designed to share our success, and to align employees' incentives with our risk framework and risk outcomes.

The quality and long-term commitment of all of our employees is fundamental to our success. We therefore aim to attract, retain and motivate the very best people who are committed to maintaining a career with the Bank, and who will perform their role in the long-term interests of shareholders. The Bank's reward package comprise the following key elements:

1. fixed pay;
2. benefits;
3. annual performance bonus; and
4. the long term performance incentive plan

A robust and effective governance framework ensures that the Bank operates within clear parameters of its compensation strategy and policy. All compensation matters, and overall compliance with regulatory requirements, are overseen by the Nomination, Remuneration and Governance Committee of the Board (BNRGC).

The Banks remuneration policy in, particular, considers the role of each employee and has set guidance depending on whether an employee is a Material Risk Taker and/ or an Approved Person in business line, control or support functions. An Approved Person is an employee whose appointment would require prior regulatory approval because of the significance of the role within the Bank and an employee is considered a Material Risk Taker if they head of significant business lines and any individuals within their control who have a material impact of the Bank's risk profile.

15 RISK MANAGEMENT DISCLOSURES

BD 000's

11 REMUNERATION RELATED DISCLOSURES (CONTINUED)

11.1 Remuneration strategy (Continued)

In order to ensure alignment between what we pay our people and our business strategy, we assess individual performance against annual and long-term financial and non-financial objectives summarised in line with our performance management system. This assessment also takes into account adherence to the Bank's values, risk and compliance measures above all and acting with integrity. Altogether, performance is therefore judged not only on what is achieved over the short and long-term but also importantly on how it is achieved, as the BNRGC believes the latter contributes to the long-term sustainability of the business.

11.2 BNRGC role and focus

The BNRGC has oversight of all reward policies for the Bank's employees. The BNRGC is the supervisory and governing body for compensation policy, practices and plans. It is responsible for determining, reviewing and proposing variable remuneration policy for approval by the Board. It is responsible for setting the principles and governance framework for all compensation decisions. The BNRGC ensures that all persons must be remunerated fairly and responsibly. The remuneration policy is reviewed on a periodic basis to reflect changes in market practices and the business plan and risk profile of the Bank.

The responsibilities of the BNRGC as regards the variable compensation policy of the Bank, as stated in its mandate, include, but are not limited to, the following:-

- Approve, monitor and review the remuneration system to ensure the system operates as intended.
- Approve the remuneration policy and amounts for each Approved Person and Material Risk-Taker, as well as total variable remuneration to be distributed, taking account of total remuneration including salaries, fees, expenses, bonuses and other employee benefits.
- Ensure remuneration is adjusted for all types of risks and that the remuneration system takes into consideration employees that earn same short-run profit but take different amount of risk on behalf of the bank.
- Ensure that for Material Risk Takers, variable remuneration forms a substantial part of their total remuneration.
- Review the stress testing and back testing results before approving the total variable remuneration to be distributed including salaries, fees, expenses, bonuses and other employee benefits.
- Carefully evaluate practices by which remuneration is paid for potential future revenues whose timing and likelihood remain uncertain. The BNRGC will question payouts for income that cannot be realized or whose likelihood of realization remains uncertain at the time of payment.
- Ensure that for approved persons in risk management, internal audit, operations, financial controls and compliance functions the mix of fixed and variable remuneration is weighted in favor of fixed remuneration.
- Recommend Board member remuneration based on their attendance and performance and in compliance with Article 188 of the Bahrain Commercial Companies Law.
- Ensure appropriate compliance mechanisms are in place to ensure that employees commit themselves not to use personal hedging strategies or remuneration-and liability-related insurance to undermine the risk alignment effects embedded in their remuneration arrangements.

As outlined in the Corporate Governance section of the Annual Report, the Board is satisfied that all non-executive directors are independent including the BNRGC members. The BNRGC comprises of the following members:

BNRGC member name	Appointment date	Number of meetings attended
Dr. Khalid Mohamed Al Khazraji	March 2017	3
Sh. Ahmed Bin Isa Al Khalifa	March 2017	3
Mr. Mohamed A. Mohsen Al Rashed	March 2017	3
Sh. Dr. Fareed Yaqoob Al Muftah	February 2015	3
Mr. Jassim Mohamed Alseddiqi ¹	April 2018	1

¹ Joined the Committee on 3rd April 2018, and then the committee was reconstituted on 11 June 2018.

The aggregate remuneration paid to the BNRGC members during the year in the form of sitting fees amounted to BHD 19,500.

15 RISK MANAGEMENT DISCLOSURES

11 REMUNERATION RELATED DISCLOSURES (CONTINUED)

11.3 External consultants

Consultants were appointed to advise the Bank on amendments to its variable remuneration policy to be in line with the CBB's Sound Remuneration Practices and industry norms. This included assistance in designing an appropriate Share-based Incentive Scheme for the Bank. The BNRGC had appointed consultants to perform a pay benchmarking exercise to assist them in reviewing the total compensation offered by the Bank.

11.4 Scope of application of the remuneration policy

The remuneration policy has been adopted on a bank-wide basis and shall not apply to its non-banking subsidiaries and operations.

11.5 Board remuneration

The Bank's board remuneration is determined in line with the provisions of Article 188 of the Bahrain Commercial Companies Law, 2001. The board of directors' remuneration will be capped so that the total remuneration (excluding sitting fees) does not exceed 10% of the Bank's net profit, after all the required deductions outlined in Article 188 of the Companies law, in any financial year. The board remuneration is subject to approval of the shareholders in the Annual General Meeting. Remuneration of non-executive directors do not include performance-related elements such as grants of shares, share options or other deferred stock-related incentive schemes, bonuses or pension benefits.

11.6 Variable remuneration for staff

The variable remuneration is performance related and consists primarily of the annual performance bonus award. As a part of the staff's variable remuneration, the annual bonus rewards delivery of operational and financial targets set each year, the individual performance of the employees in achieving those targets, and their contribution to delivering the Bank's strategic objectives.

The Bank has adopted a Board approved framework to develop a transparent link between variable remuneration and performance. The framework is designed on the basis that the combination of meeting both satisfactory financial performance and achievement of other non-financial factors, would, all other things being equal, deliver a target bonus pool for the employees, prior to consideration of any allocation to business lines and employees individually. In the framework adopted in determining the variable remuneration pool, the BNRGC aims to balance the distribution of the Bank's profits between shareholders and employees.

The key performance metrics at the bank level include a combination of short term and long term measures and include profitability, solvency, liquidity and growth indicators. The performance management process ensures that all goals are appropriately cascaded down to respective business units and employees.

In determining the amount of variable remuneration, the Bank starts from setting specific targets and other qualitative performance measures that would result in a target top-down bonus pool. The bonus pool is then adjusted to take account of risk via the use of risk-adjusted measures (including forward-looking considerations).

The BNRGC carefully evaluates practices by which remuneration is paid for potential future revenues whose timing and likelihood remain uncertain. BNRGC demonstrates that its decisions are consistent with an assessment of the Bank's financial condition and future prospects.

The Bank uses a formalized and transparent process to adjust the bonus pool for quality of earnings. It is the Bank's objective to pay out bonuses out of realized and sustainable profits. If the quality of earnings is not strong, the profit base could be adjusted based on the discretion of the BNRGC.

For the overall Bank to have any funding for distribution of bonus pool; thresholds of financial targets have to be achieved. The performance measures ensure that the total variable remuneration is generally considerably contracted where subdued or negative financial performance of the Bank occurs. Furthermore, the target bonus pool as determined above is subject to risk adjustments in line with the risk adjustment and linkage framework.

11 REMUNERATION RELATED DISCLOSURES (CONTINUED)

11.6 Variable remuneration for staff (Continued)

Remuneration of control functions

The remuneration level of staff in the control and support functions allows the Bank to employ qualified and experienced personnel in these functions. The Bank ensures that the mix of fixed and variable remuneration for control and support function personnel should be weighted in favor of fixed remuneration. The variable remuneration of control functions is based on function-specific objectives and is not determined by the individual financial performance of the business area they monitor.

The Bank's performance management system plays a major role in deciding the performance of the support and control units on the basis of the objectives set for them. Such objectives are more focused on non-financial targets that include risk, control, compliance and ethical considerations as well as the market and regulatory environment apart from value adding tasks which are specific to each unit.

Variable compensation for business units

The variable compensation for the business units is primarily decided by the key performance objectives set through the performance management system of the Bank. Such objectives contain financial and non-financial targets, including risk control, compliance and ethical considerations as well as market and regulatory environment. The consideration of risk assessment in the performance evaluation of individuals ensures that any two employees who generate the same short-run profit but take different amounts of risk on behalf of the bank are treated differently by the remunerations system.

11.7 Risk assessment framework

The purpose of the risk linkages is to align variable remuneration to the risk profile of the Bank. In its endeavor to do so, the Bank considers both quantitative measures and qualitative measures in the risk assessment process. Both quantitative measures and human judgment play a role in determining risk adjustments. The risk assessment process encompasses the need to ensure that the remuneration policy designed reduces employees' incentives to take excessive and undue risk is symmetrical with risk outcomes and has an appropriate mix of remuneration that is consistent with risk alignment.

The Bank's BNRGC considers whether the variable remuneration policy is in line with the Bank's risk profile and ensures that through the Bank's ex-ante and ex-post risk assessment framework and processes, remuneration practices where potential future revenues whose timing and likelihood remain uncertain are carefully evaluated.

Risk adjustments take into account for all types of risk, including intangible and other risks such as reputation risk, liquidity risk and the cost of capital. The Bank undertakes risk assessment to review financial and operational performance against the business strategy and risk performance prior distribution of the annual bonus. The Bank ensures that total variable remuneration does not limit its ability to strengthen its capital base. The extent to which capital needs to be built up is a function of a bank's current capital position and its ICAAP.

The bonus pool takes into account the performance of the Bank which is considered within the context of the Bank's risk management framework. This ensures that the variable pay pool is shaped by risk considerations and Bank-wide notable events.

The size of the variable remuneration pool and its allocation within the bank takes into account the full range of current and potential risks, including:

- (a) The cost and quantity of capital required to support the risks taken;
- (b) The cost and quantity of the liquidity risk assumed in the conduct of business; and
- (c) Consistency with the timing and likelihood of potential future revenues incorporated into current earnings.

The BNRGC keeps itself abreast with the Bank's performance against the risk management framework. The BNRGC will use this information when considering remuneration to ensure the return, risk and remuneration are aligned.

15 RISK MANAGEMENT DISCLOSURES

11 REMUNERATION RELATED DISCLOSURES (CONTINUED)

11.7 Risk assessment framework (Continued)

Risk adjustments

The Bank has an ex-post risk assessment framework which is a qualitative assessment to back-test actual performance against risk assumptions.

In years where the Bank suffers material losses in the financial performance, the risk adjustment framework would work as follows:

- There would be considerable contraction of the Bank's total variable remuneration.
- At the individual level, poor performance by the Bank would mean individual KPIs are not met and hence employee performance ratings would be lower
- Reduction in value of deferred shares or awards
- Possible changes in vesting periods and additional deferral applied to unvested rewards
- Lastly, if the qualitative and quantitative impact of a loss incident is considered significant, a malus or clawback of previous bonus awards may be considered.

The BNRGC, with Board's approval, can rationalize and make the following discretionary decisions:

- Increase / reduce the ex-post adjustment
- Consider additional deferrals or increase in the quantum of share awards
- Recovery through malus and clawback arrangements

Malus and Clawback framework

The Bank's malus and clawback provisions allows the Bank's Board of Directors to determine that, if appropriate, unvested elements under the deferred bonus plan can be forfeited/ adjusted or the delivered variable compensation could be recovered in certain situations. The intention is to allow the Bank to respond appropriately if the performance factors on which reward decisions were based turn out not to reflect the corresponding performance in the longer term. All deferred compensation awards contain provisions that enable the Bank to reduce or cancel the awards of employees whose individual behavior has had a materially detrimental impact on the Bank during the concerned performance year.

Any decision to take back an individual's award can only be taken by the Bank's Board of Directors.

The Bank's malus and clawback provisions allows the Bank's Board to determine that, if appropriate, vested /unvested elements under the deferred bonus plan can be adjusted/ cancelled in certain situations. These events include the following:

- Reasonable evidence of willful misbehavior, material error, negligence or incompetence of the employee causing the Bank/the employee's business unit to suffer material loss in its financial performance, material misstatement of the Bank's financial statements, material risk management failure or reputational loss or risk due to such employee's actions, negligence, misbehavior or incompetence during the concerned performance year.
- The employee deliberately misleads the market and/or shareholders in relation to the financial performance of the Bank during the concerned performance year.
- Clawback can be used if the malus adjustment on the unvested portion is insufficient given the nature and magnitude of the issue.

11 REMUNERATION RELATED DISCLOSURES (CONTINUED)

11.8 Components of Variable remuneration

Variable remuneration has following main components:

Upfront cash	The portion of the variable compensation that is awarded and paid out in cash on conclusion of the performance evaluation process for each year.
Deferred cash	The portion of variable compensation that is awarded and paid in cash on a pro-rata basis over a period of 3 years.
Upfront share awards	The portion of variable compensation that is awarded and issued in the form of shares on conclusion of the performance evaluation process for each year.
Deferred shares	The portion of variable compensation that is awarded and paid in the form of shares on a pro-rata basis over a period of 3 years.

All deferred awards are subject to malus provisions. All share awards are released to the benefit of the employee after a six month retention period from the date of vesting. The number of equity share awards is linked to the Bank's share price as per the rules of the Bank's Share Incentive Scheme. Any dividend on these shares is released to the employee along with the shares (i.e. after the retention period).

11.9 Deferral of variable remuneration

All employees above the grade of a Senior Manager shall be subject to deferral of variable remuneration as follows:

Element of variable remuneration	CEO, Deputy and other 5 most highly paid business line employees	Other covered staff	Deferral period	Retention	Malus	Clawback
Upfront cash	40%	50%	immediate	-	-	Yes
Upfront shares	-	10%	immediate	6 months	Yes	Yes
Deferred cash	10%	-	Over 3 years	-	Yes	Yes
Deferred share awards	50%	40%	Over 3 years	6 months	Yes	Yes

The BNRGC, based on its assessment of role profiles and risk taken by an employee could increase the coverage of employees that would subject to deferral arrangements.
